Done

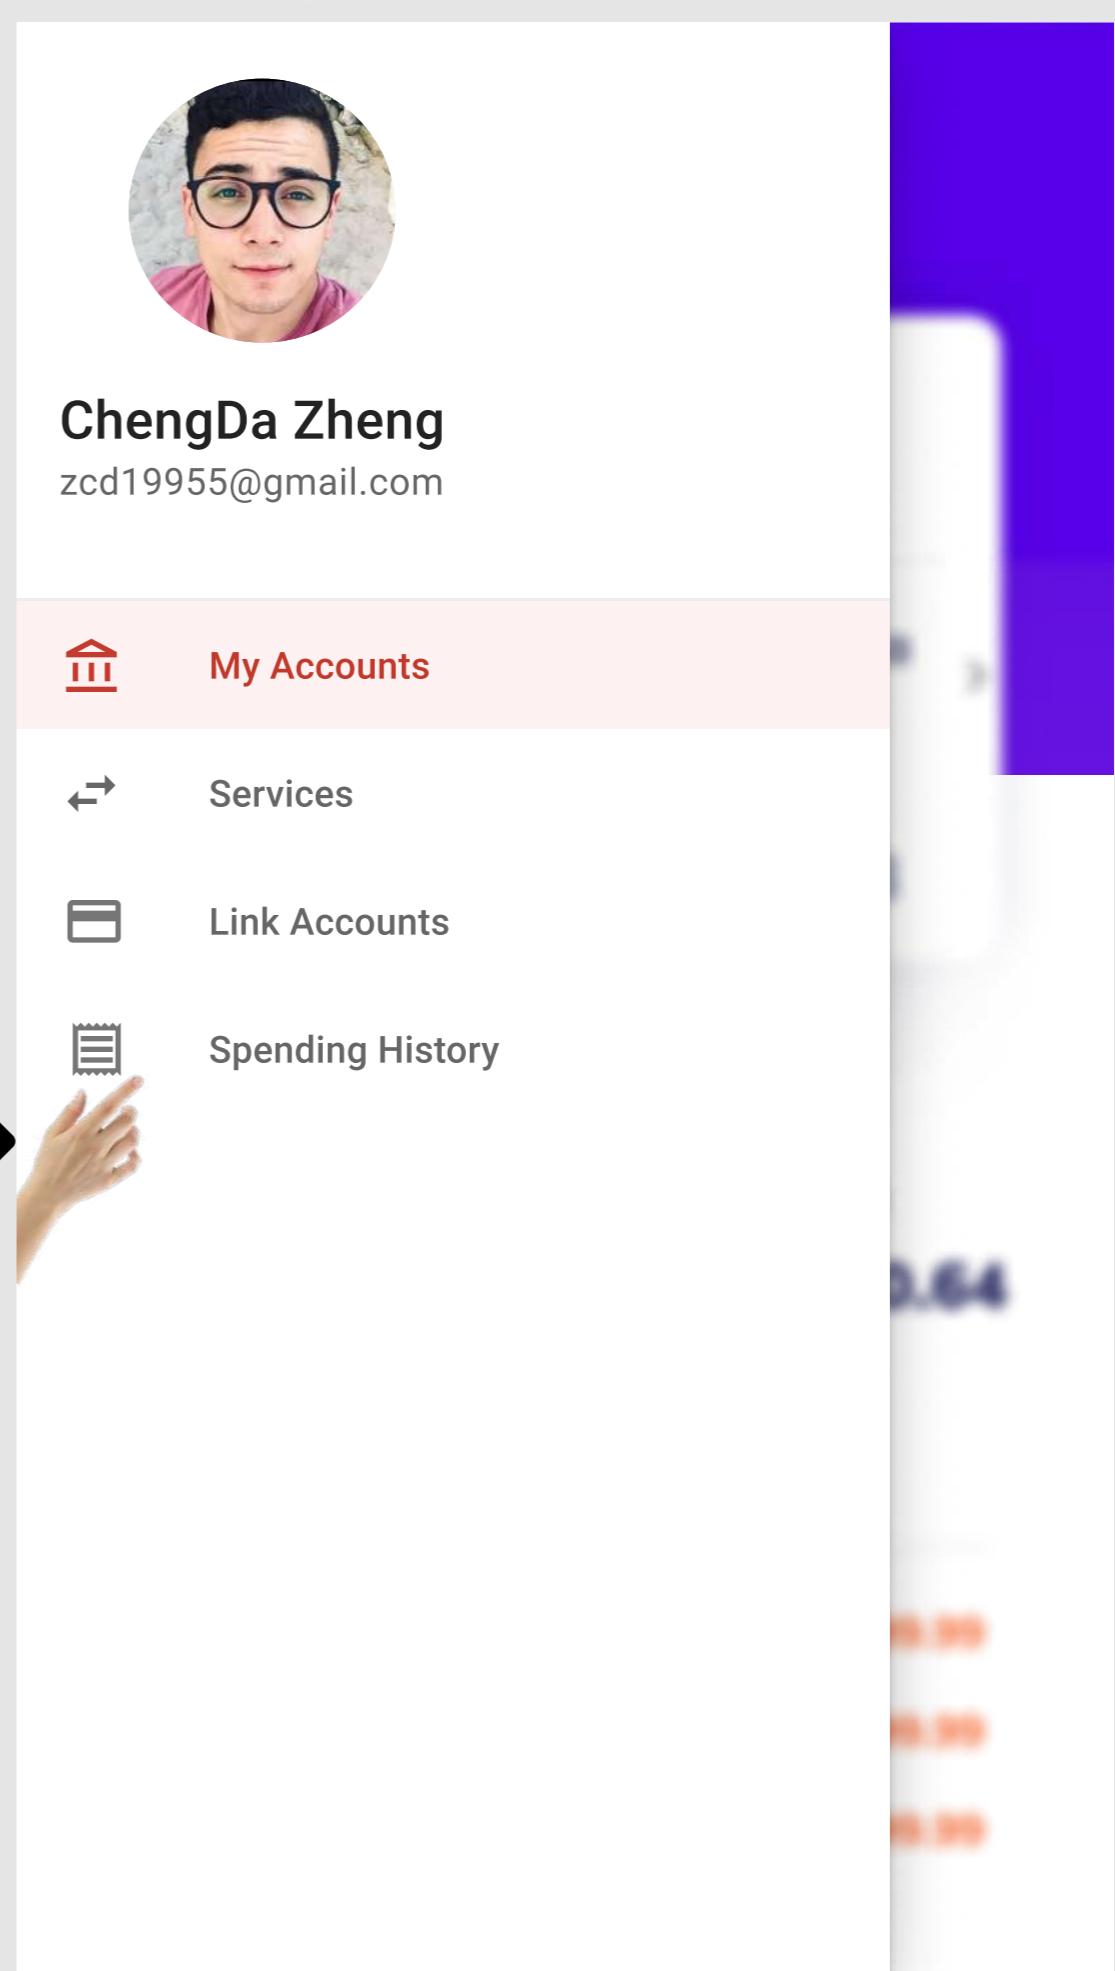

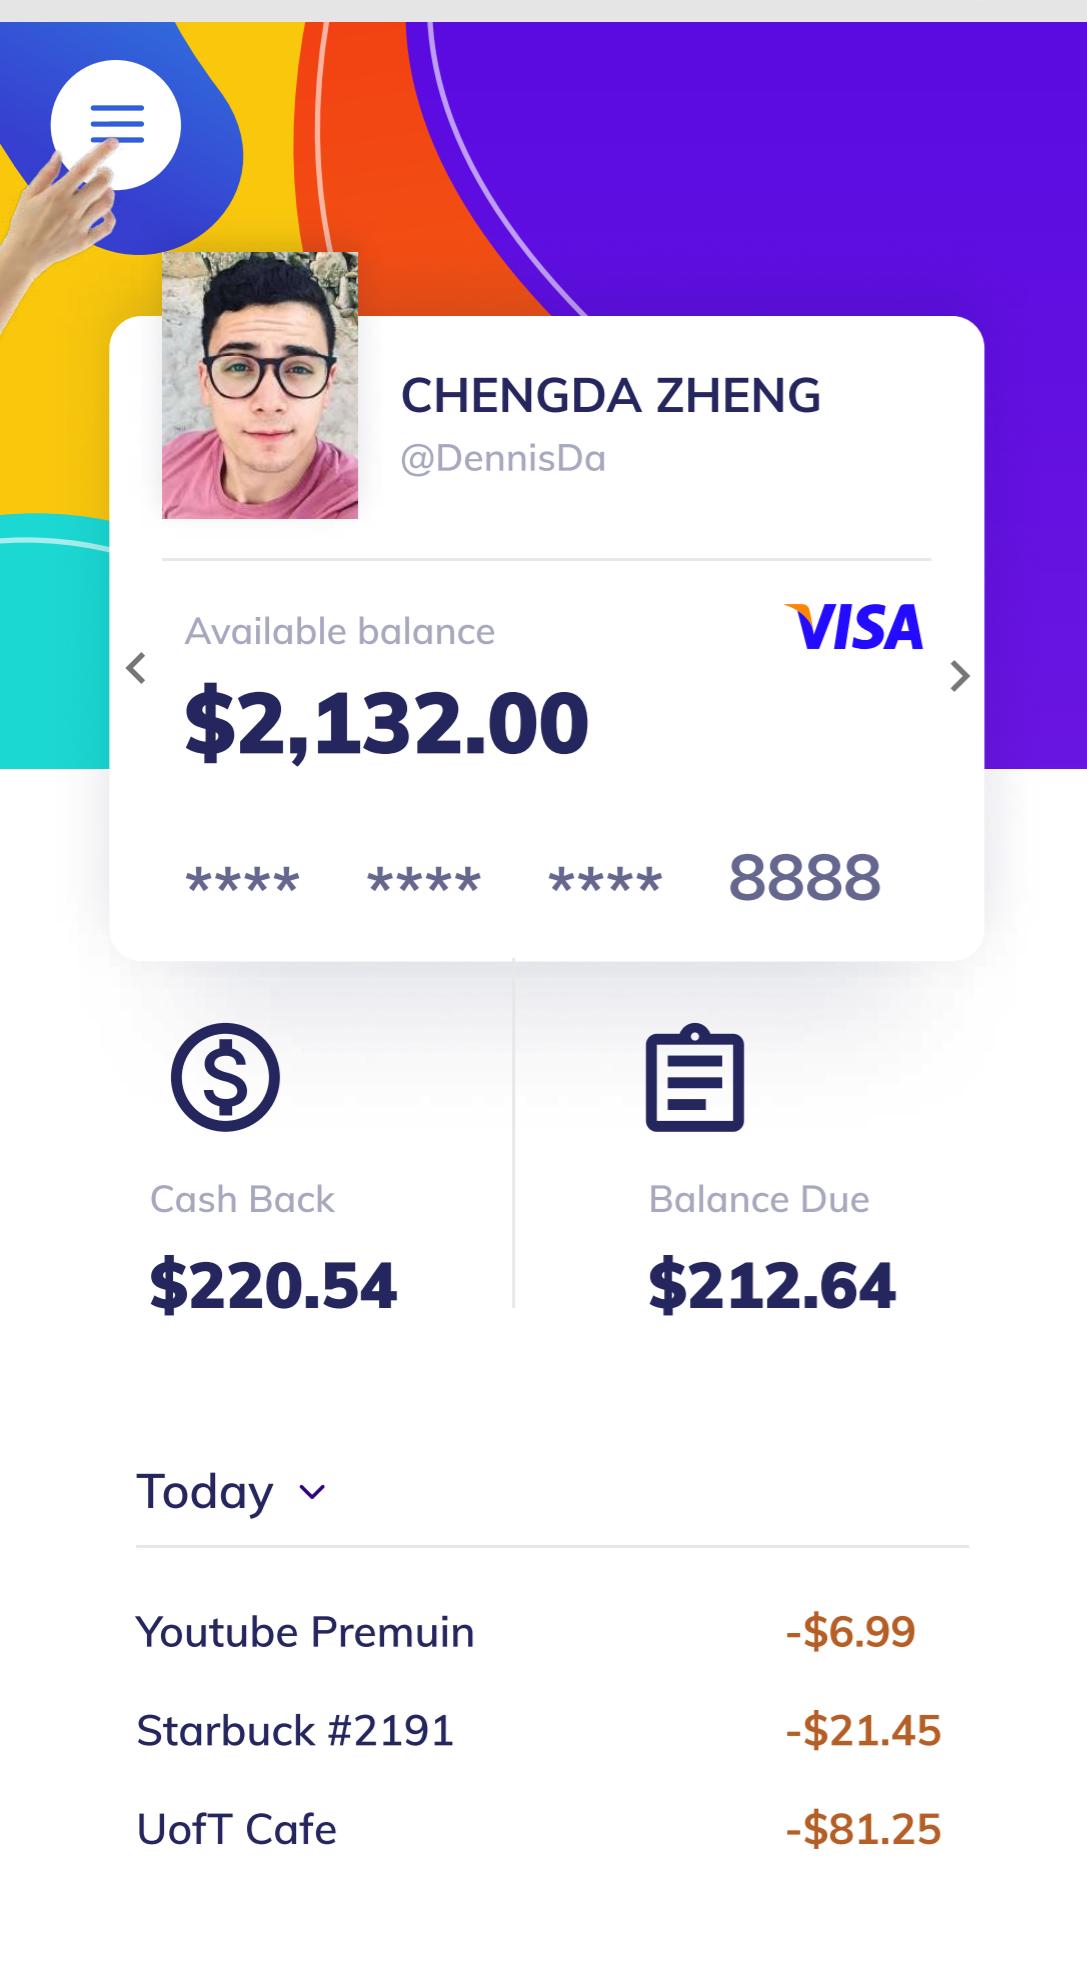

Resend code

Annotation: Click Done to verify the code

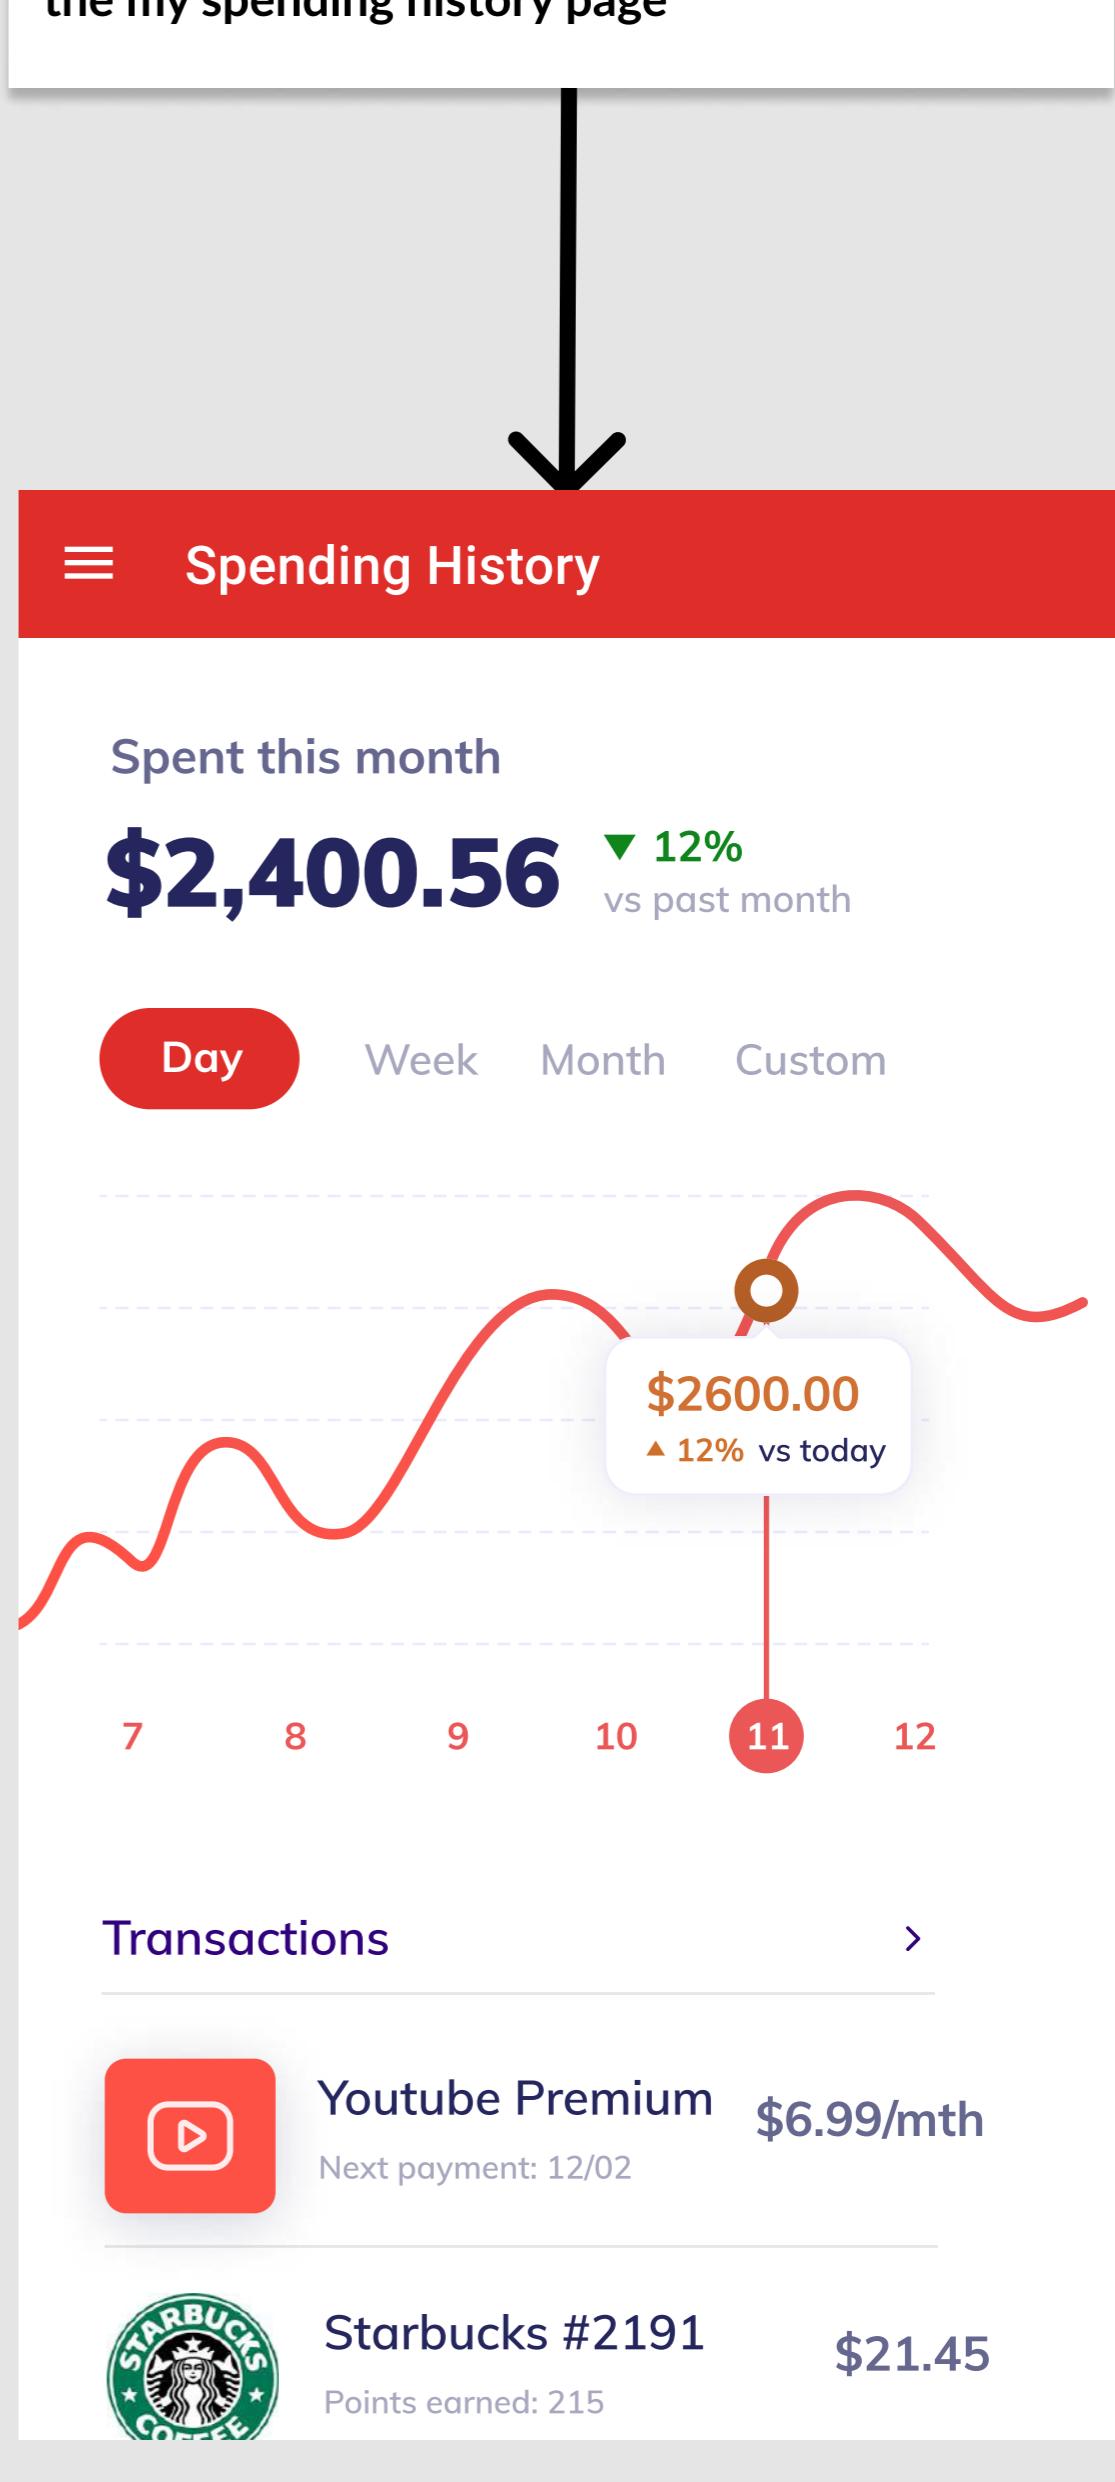

Annotation: This screen automatically fed out in three seconds and user will be navigated to the home page

# Home Page and Spending History

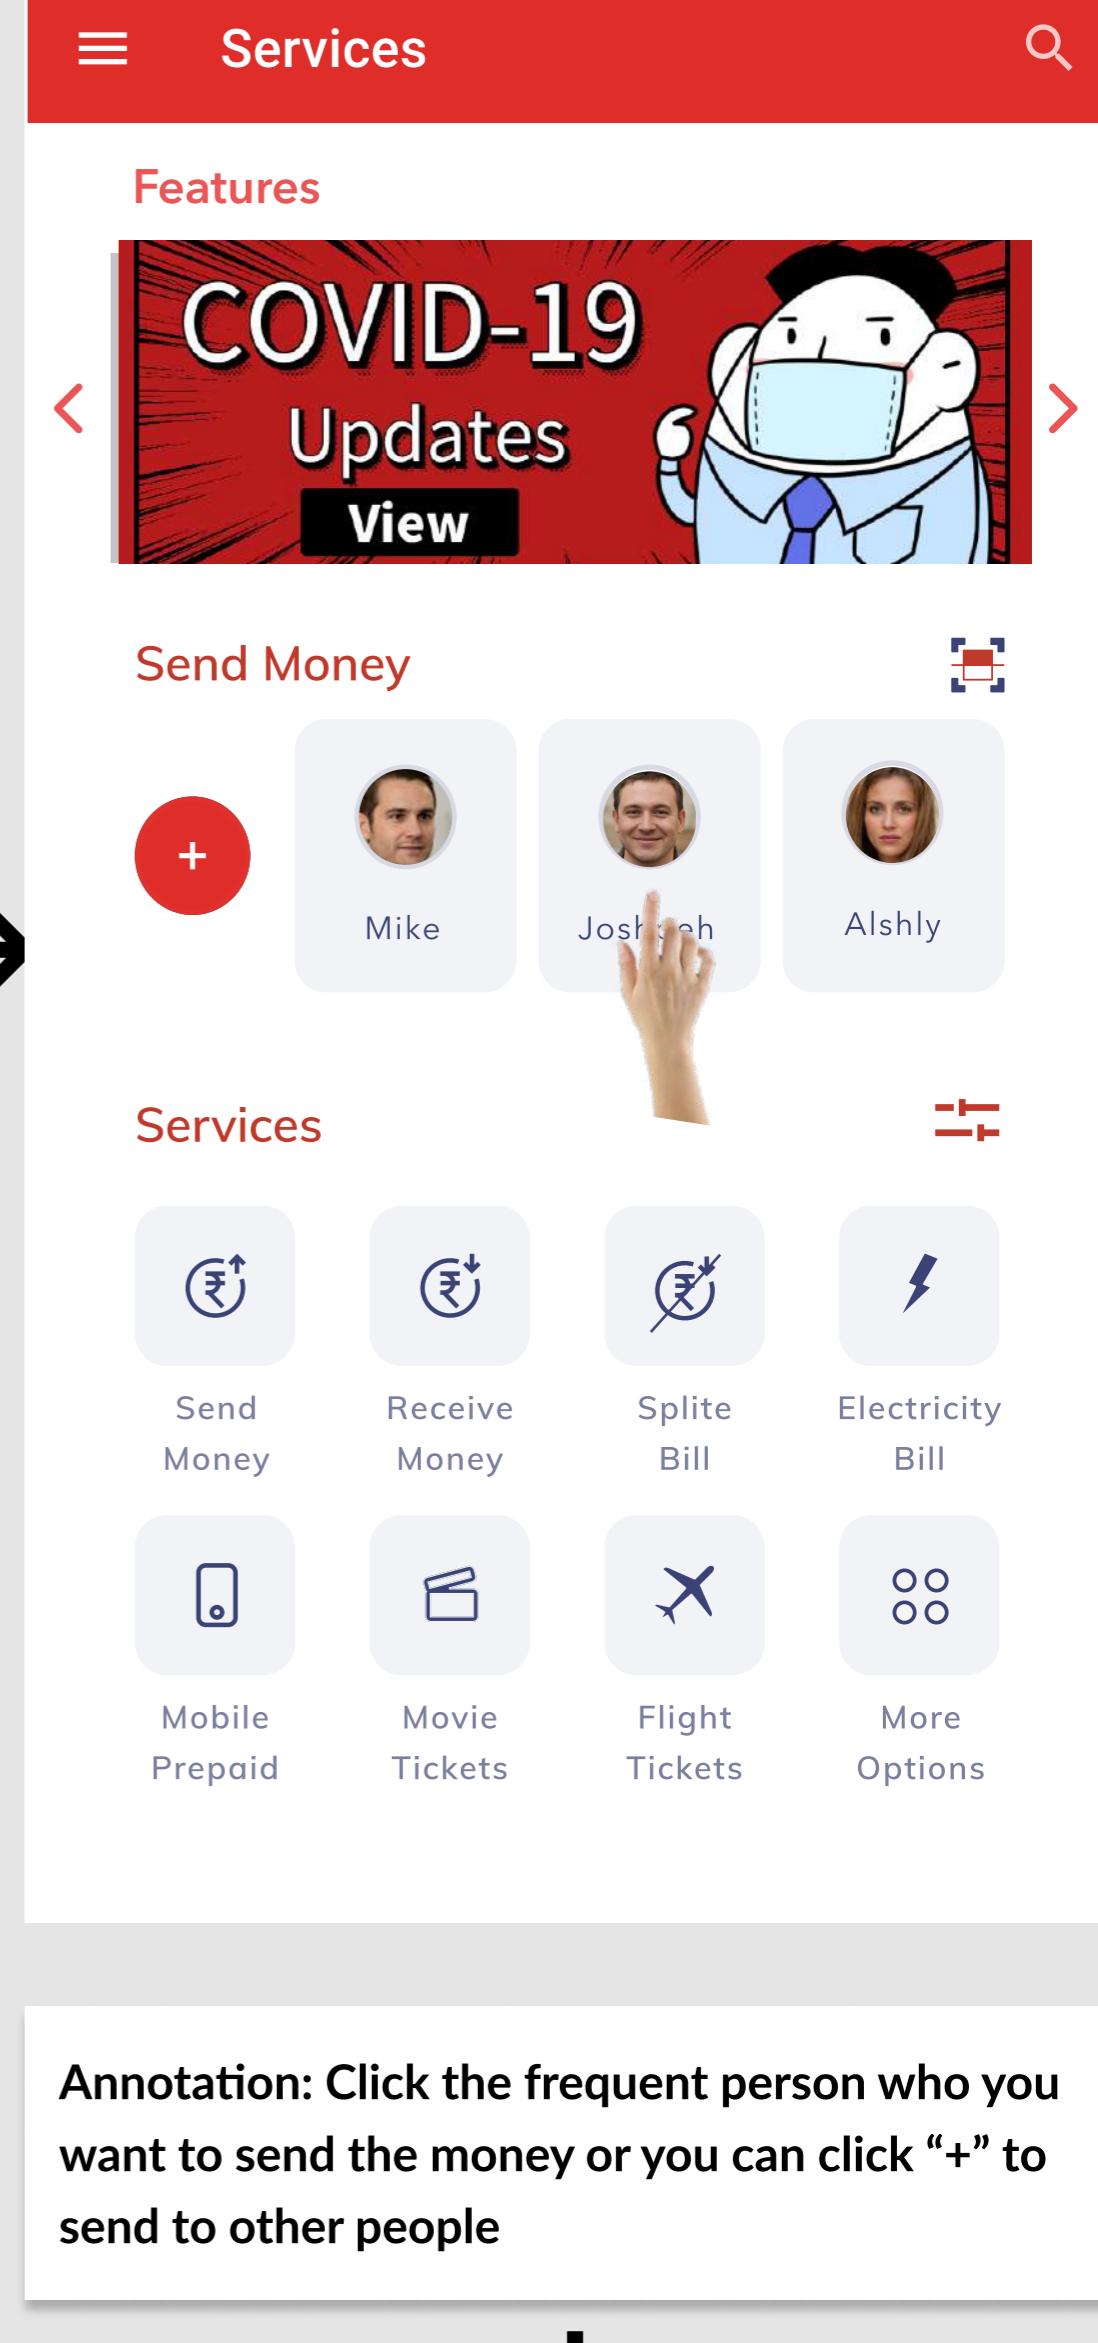

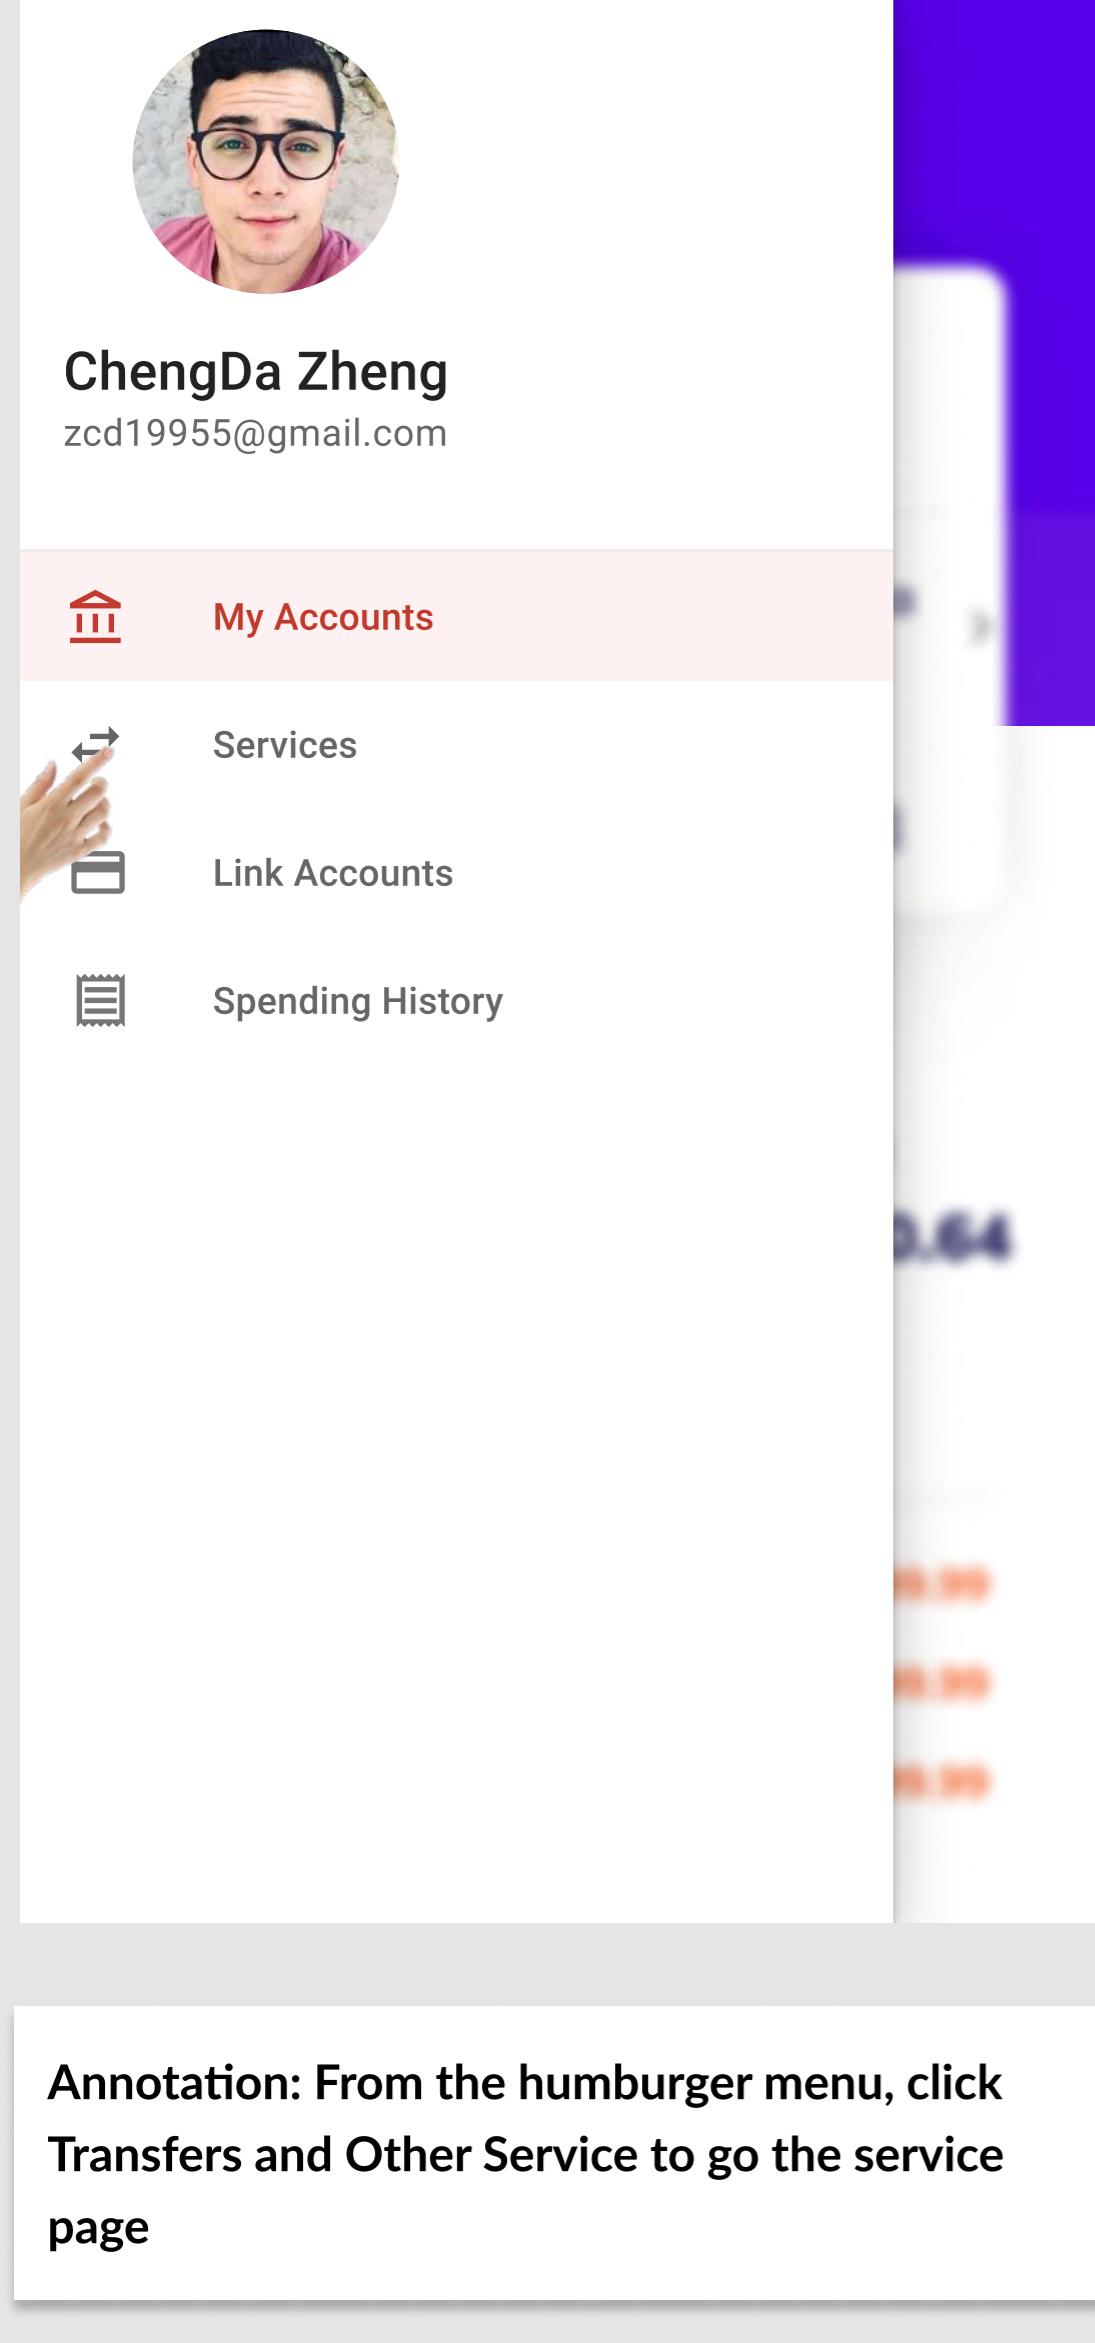

Annotation: Home page and the user could see their overview information from the different financial accounts from a different institution. Click the hamburger menu to open up the menu

Annotation: Click the spending history to go to the my spending history page

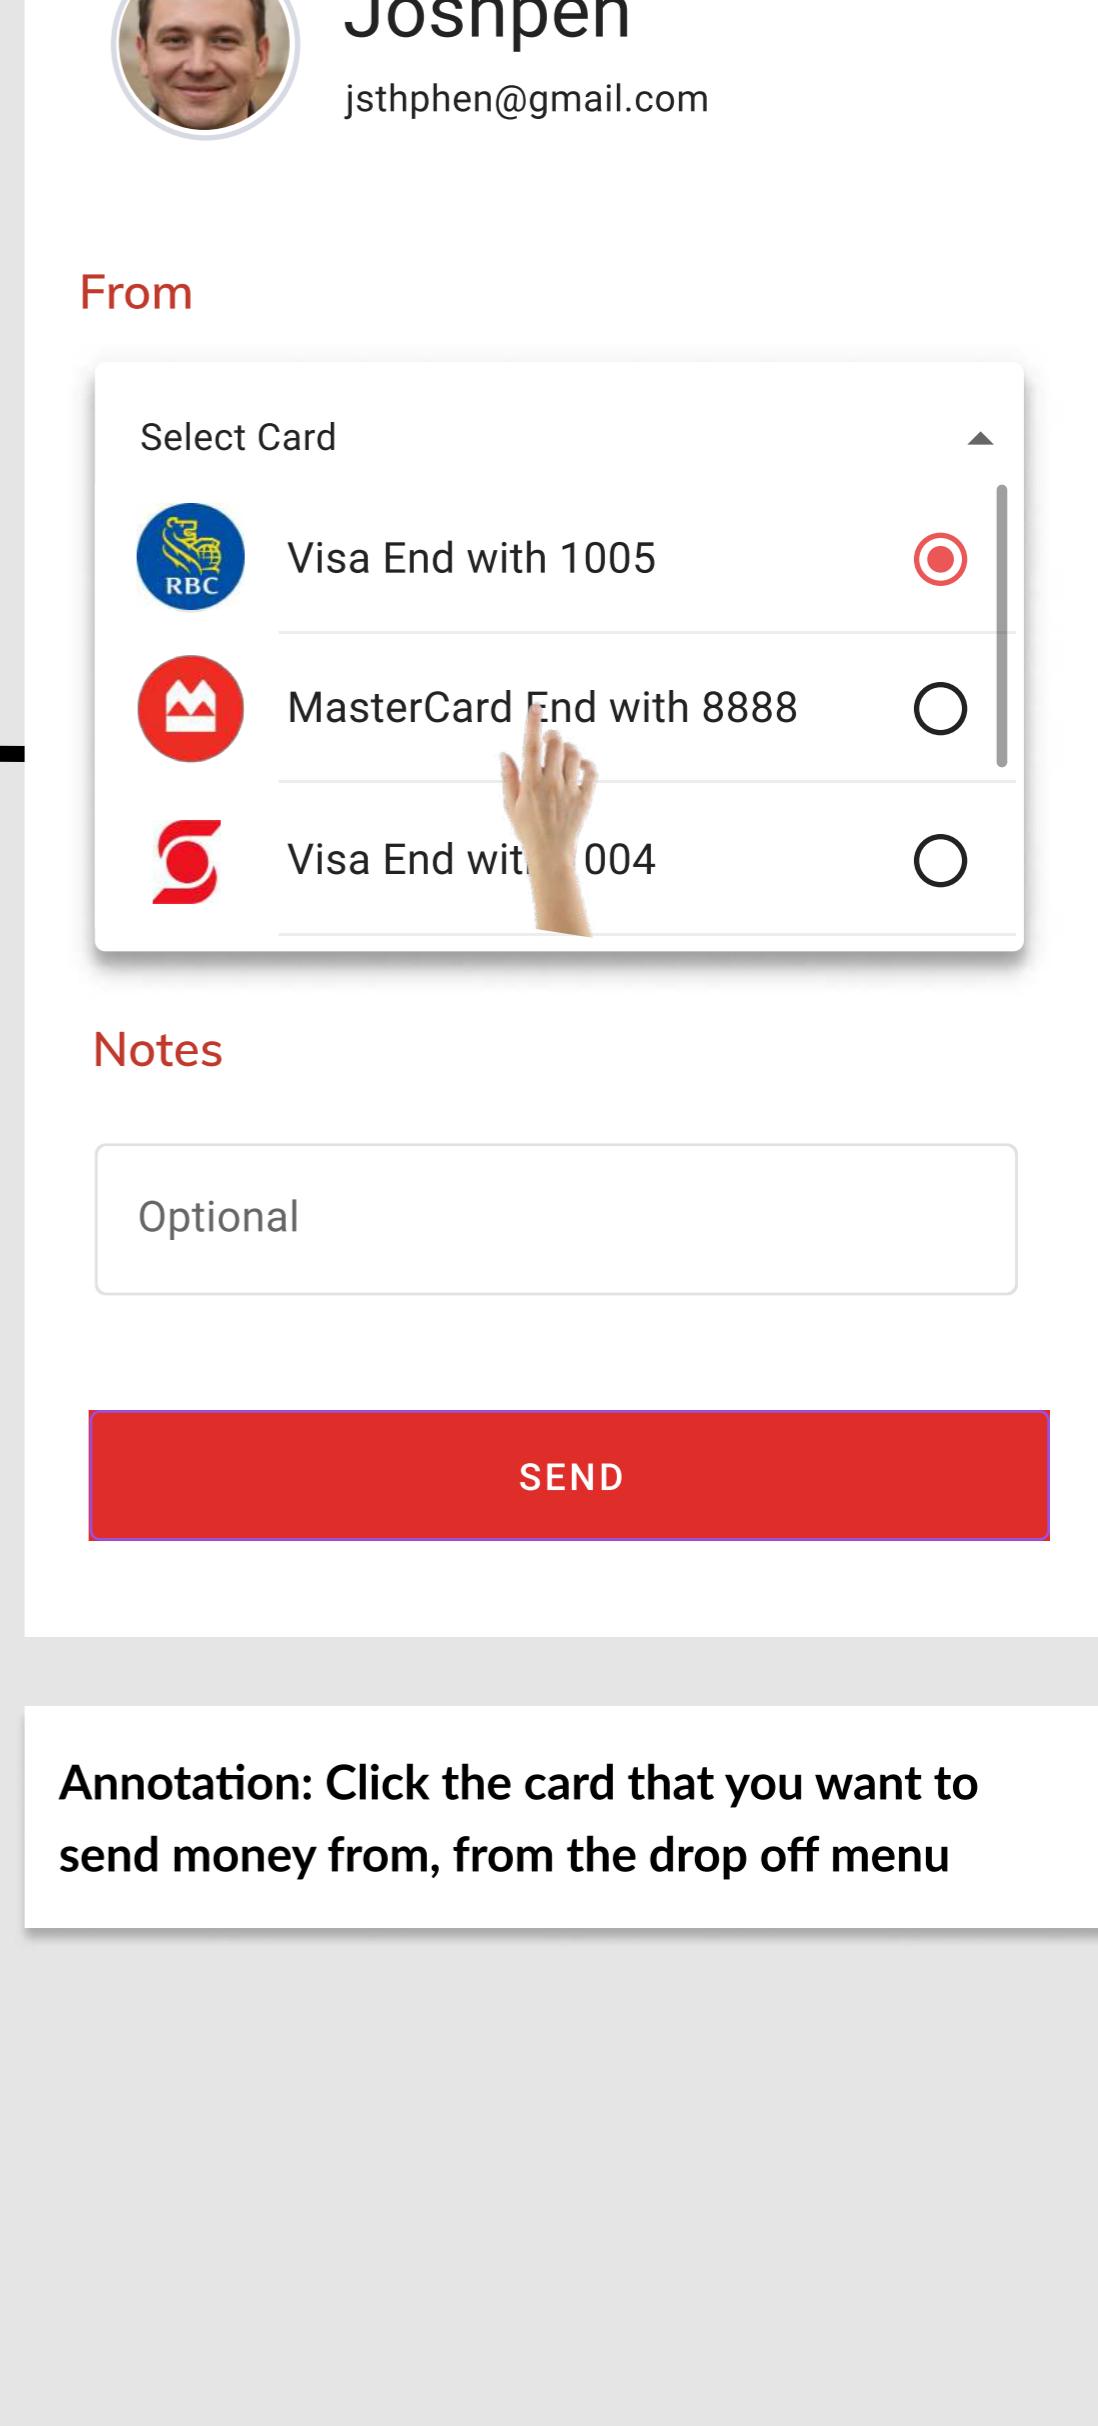

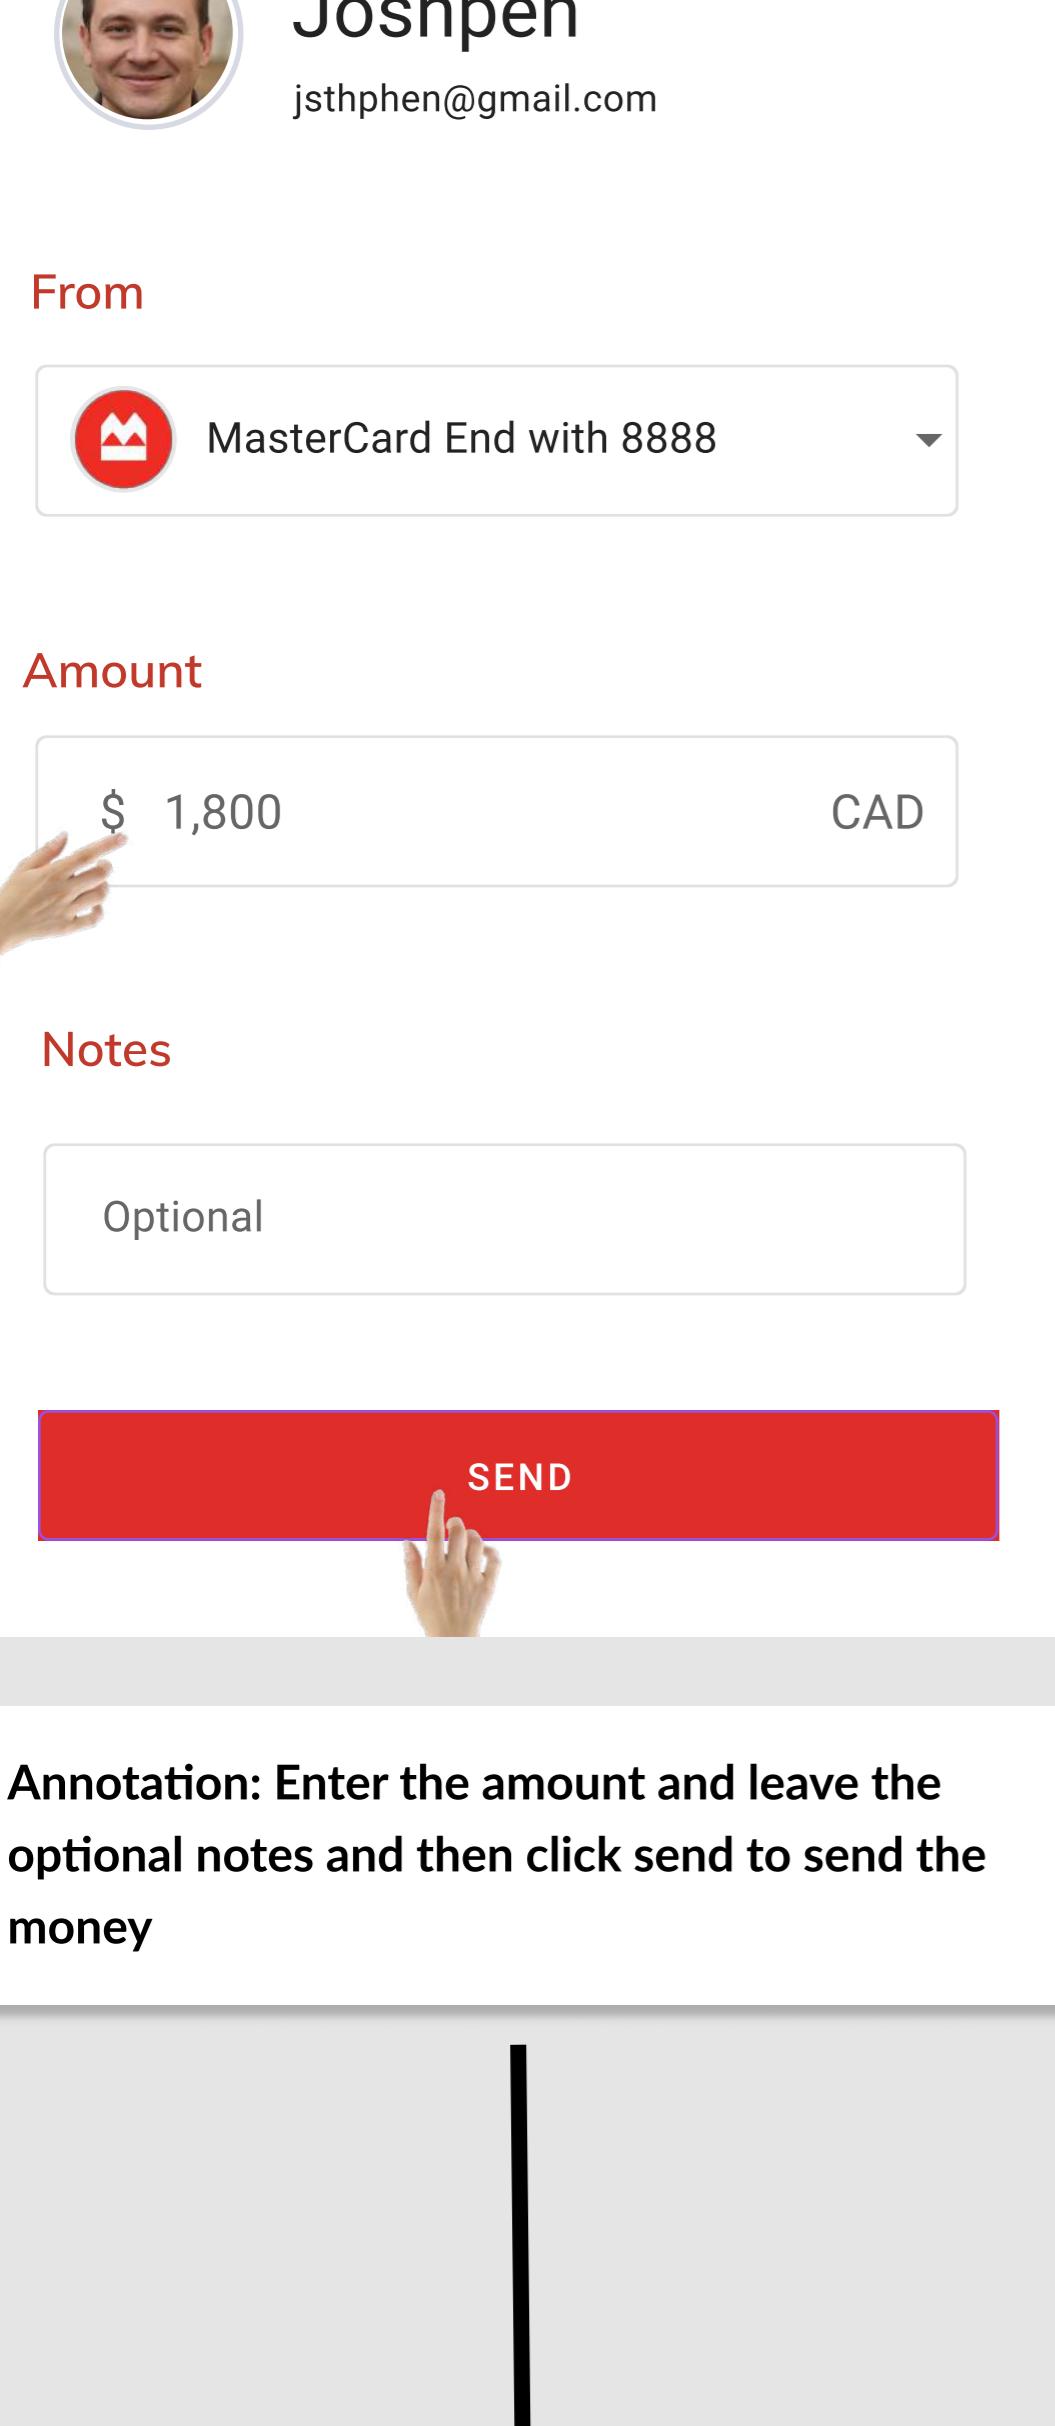

Annotation: User can see how much you spent month by month. I differentiated the orange and red colour according to Velian's suggestion in order to differentiate the money flow and the main theme colour.

# Transfer Fund to Others

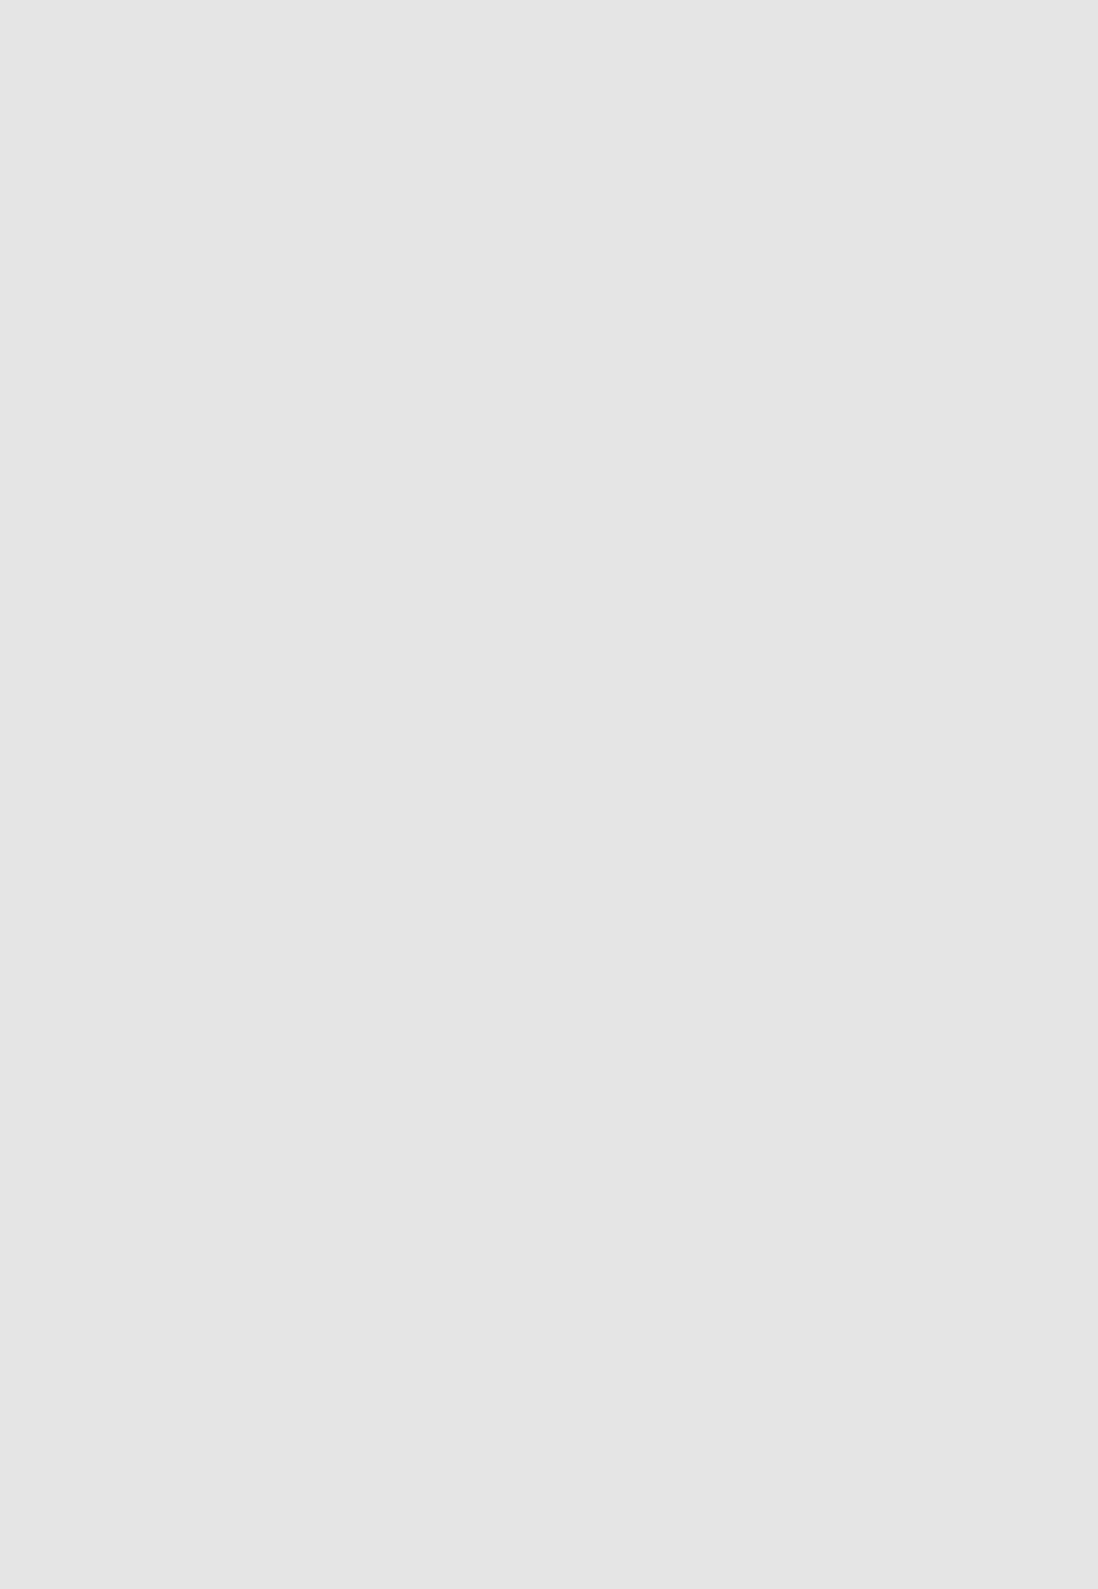

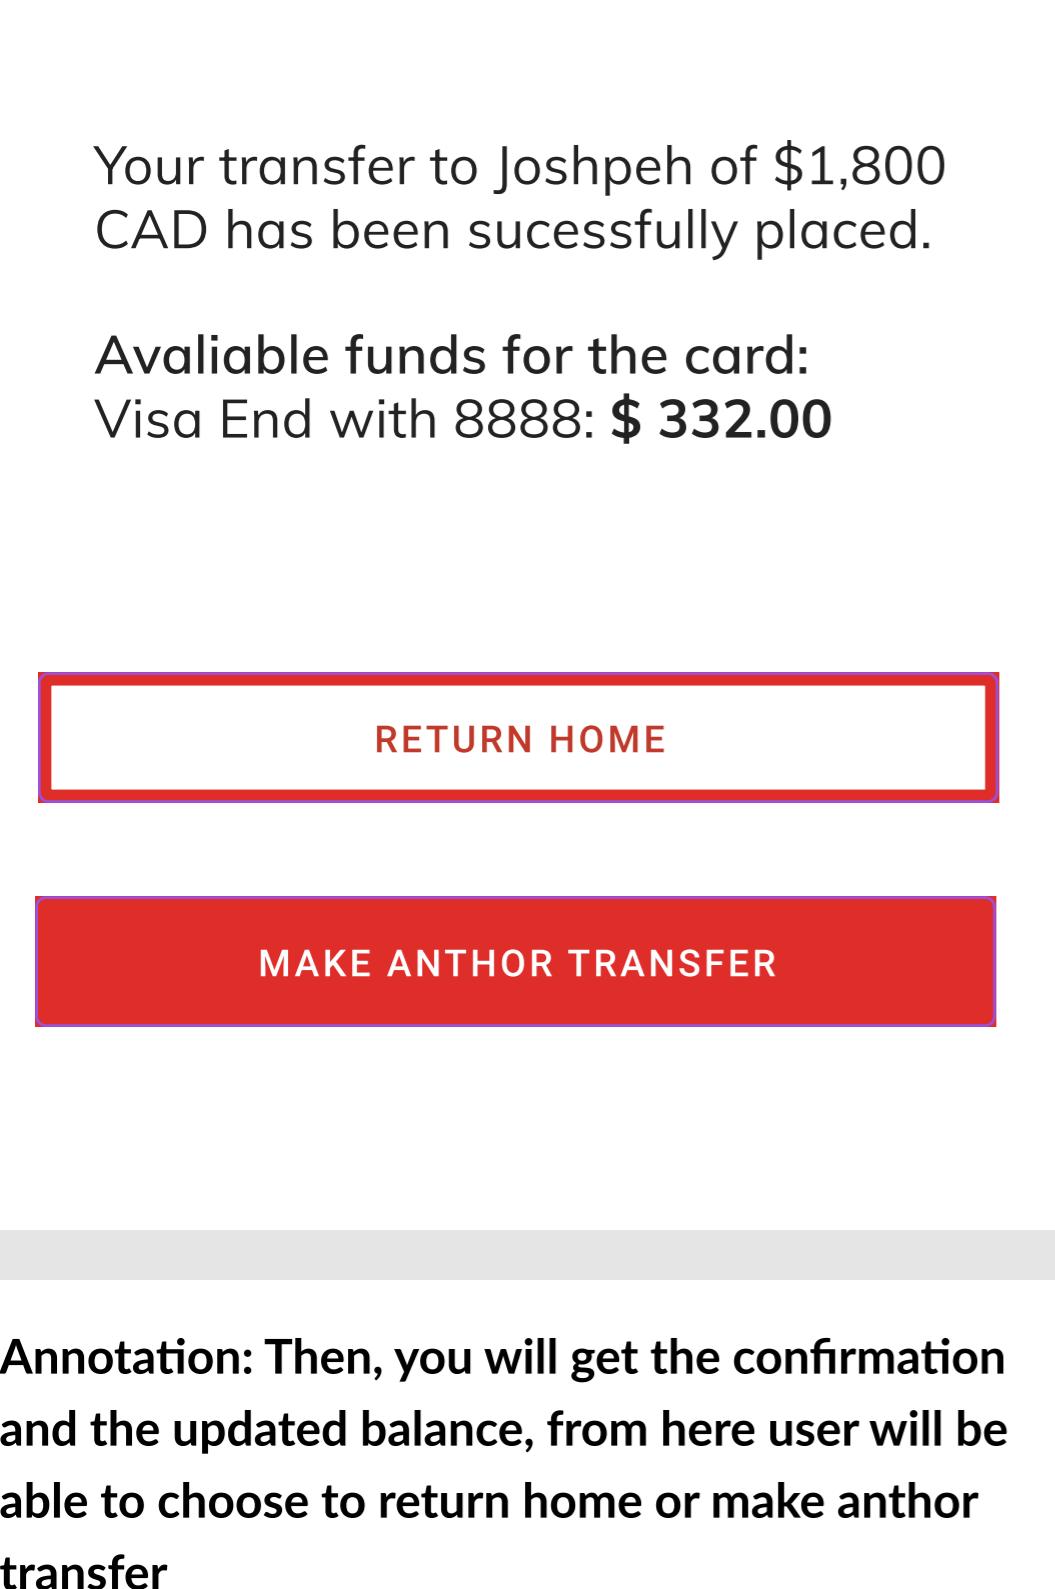

Annotation: From the hamburger menu, click Transfers and Other Service to go the service page

Annotation: Click the frequent person who you want to send the money or you can click "+" to send to other people

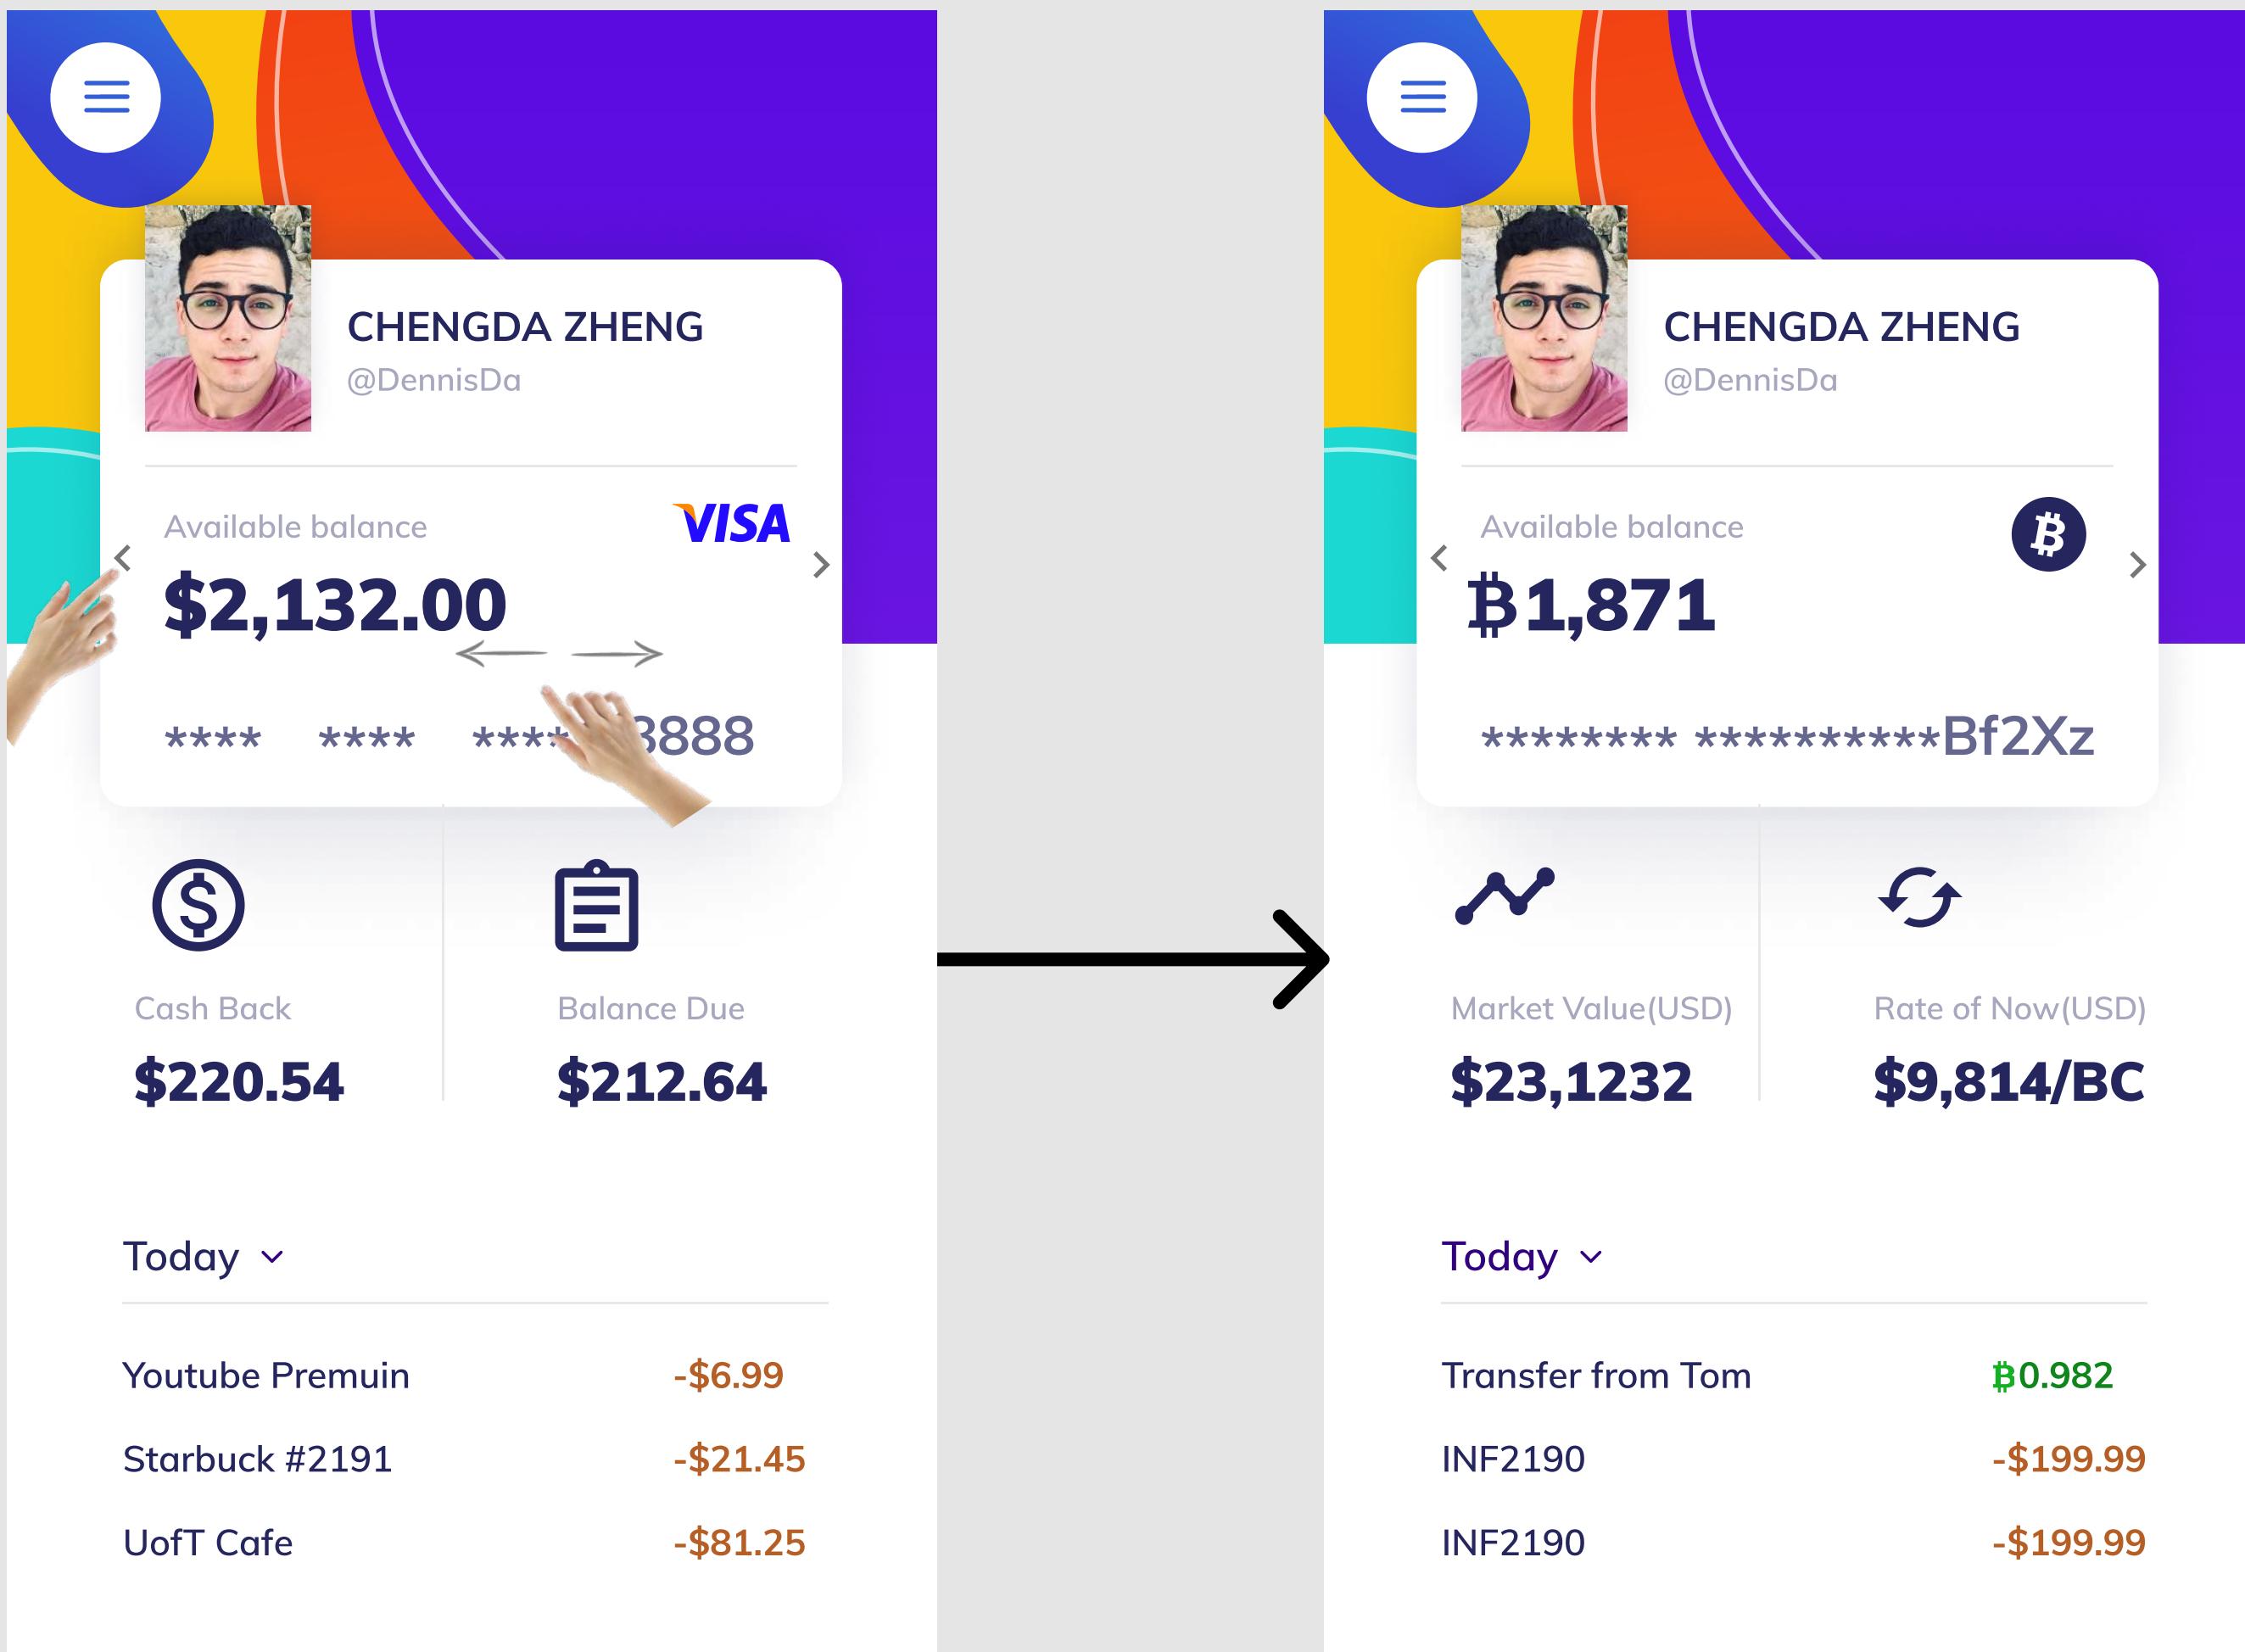

Annotation: Enter the amount and leave the optional notes and then click send to send the money

Annotation: Click the card that you want to send money from, from the drop off menu

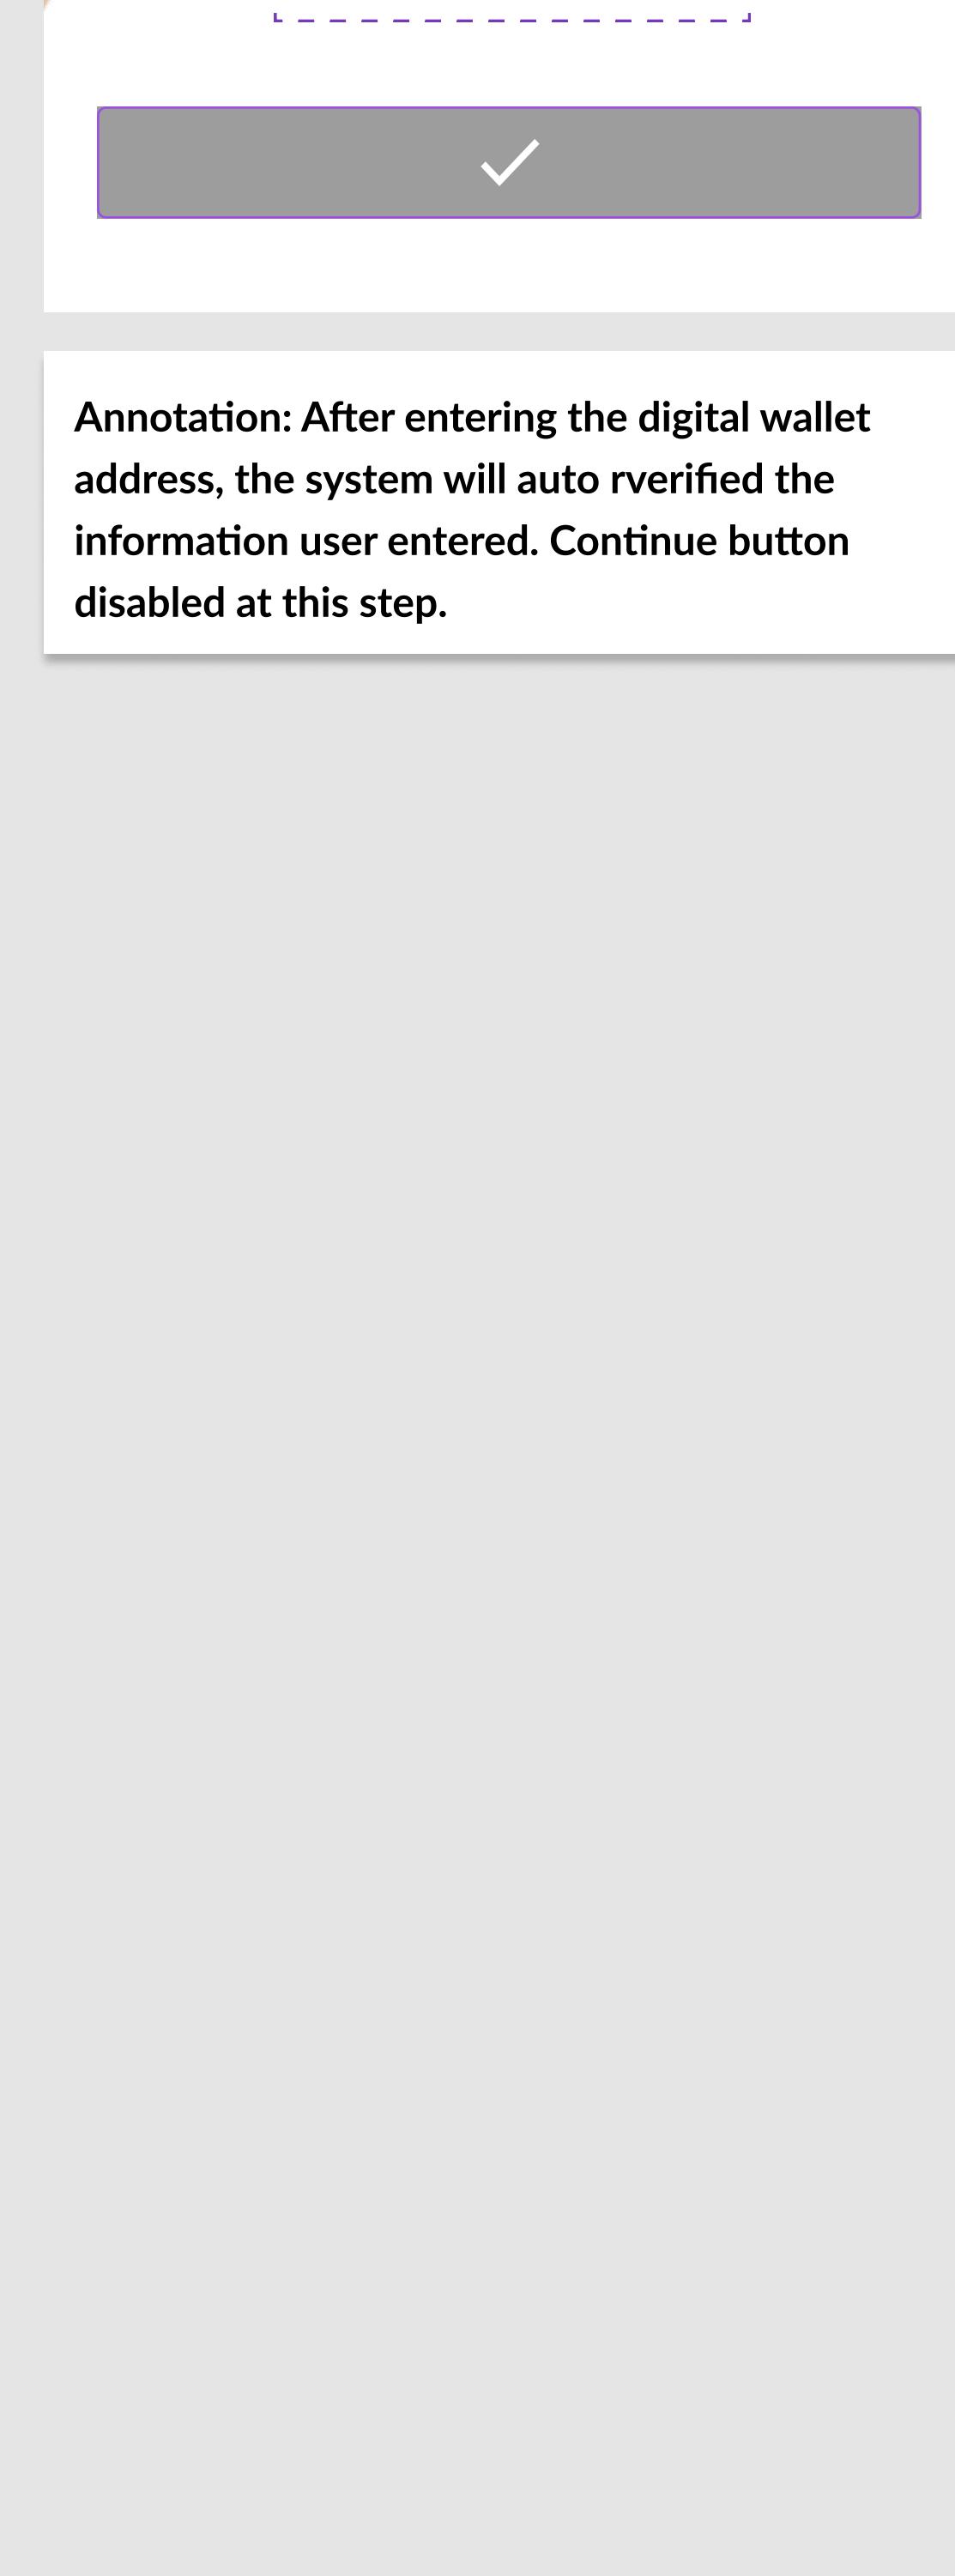

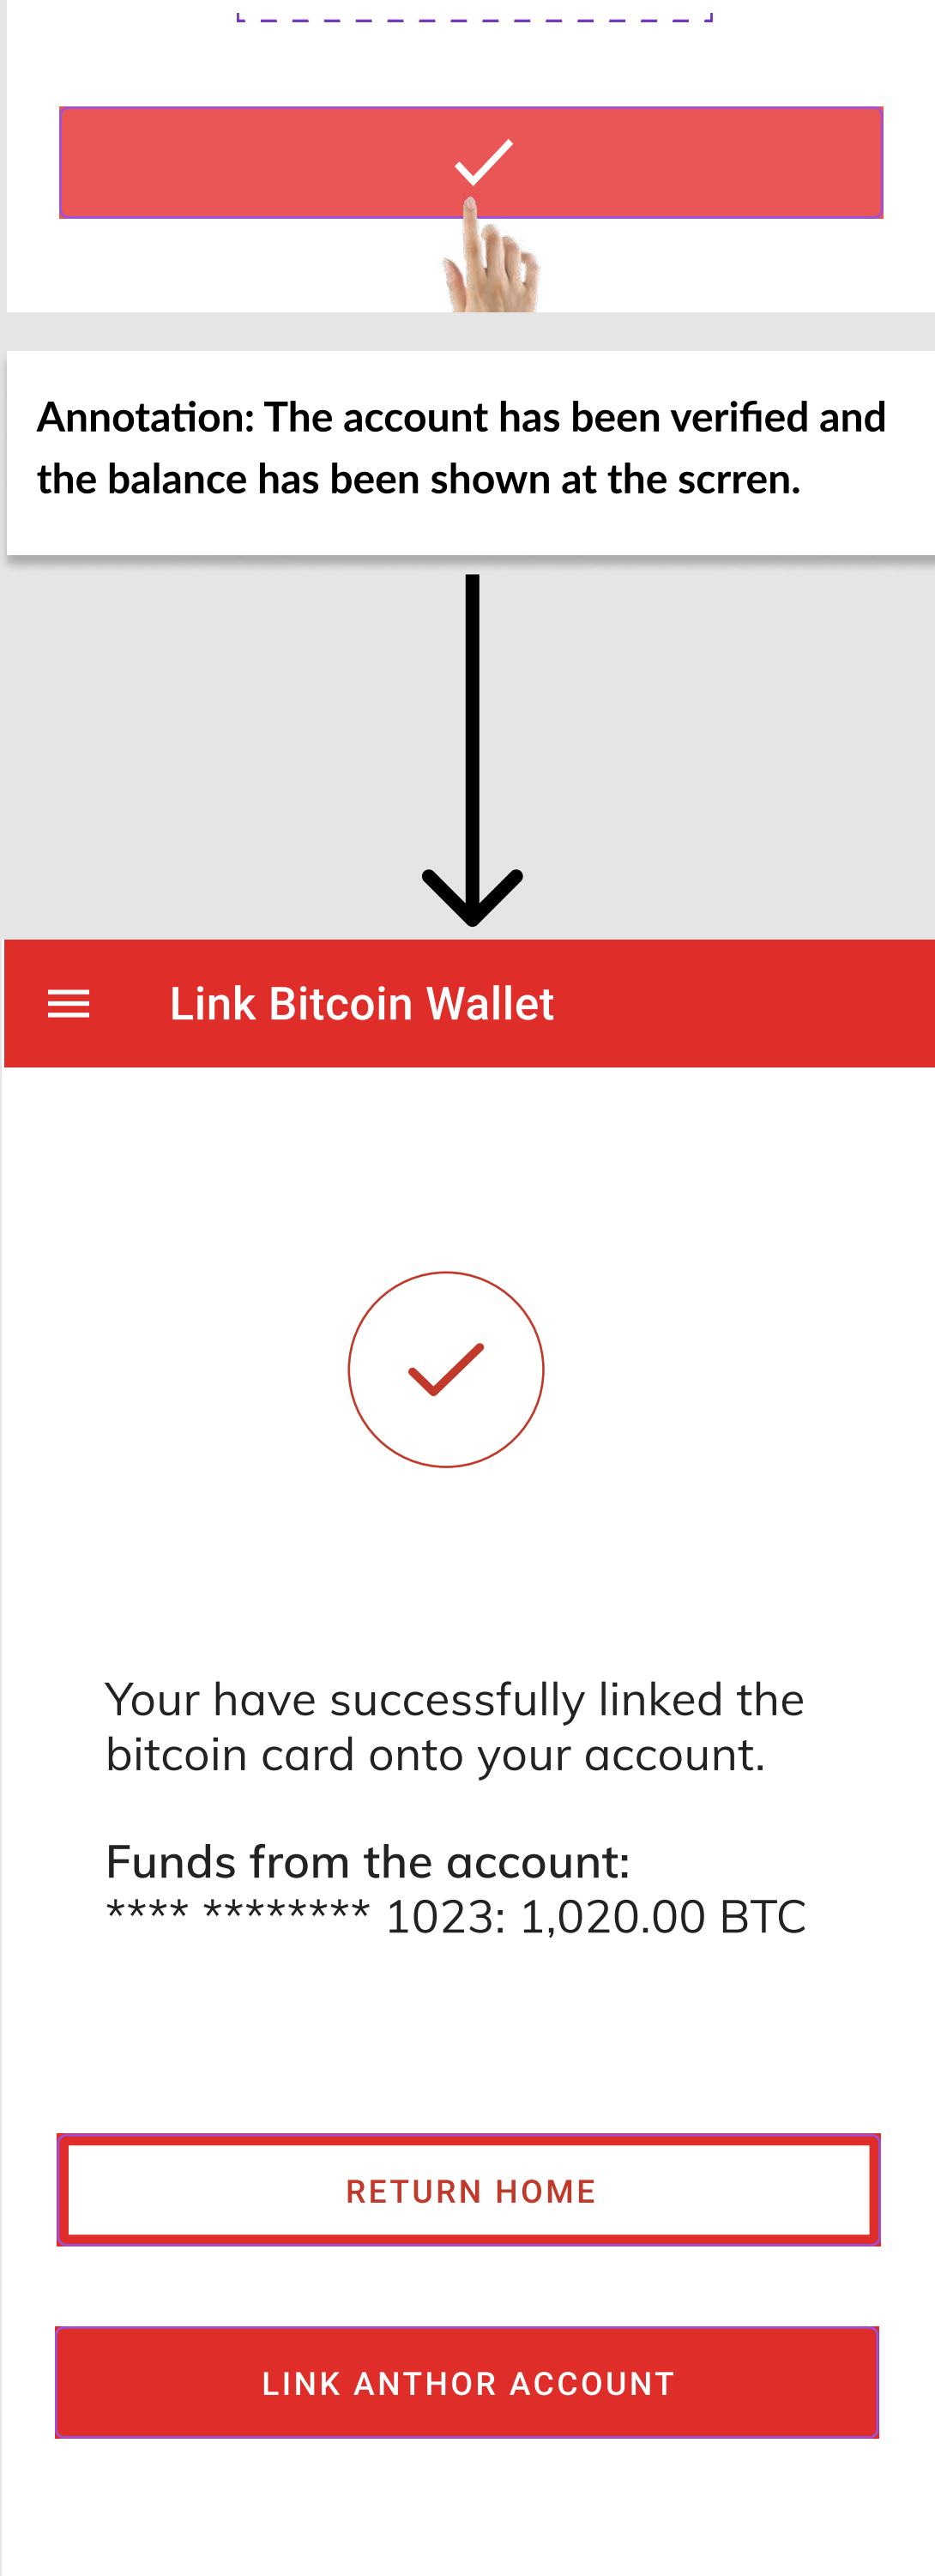

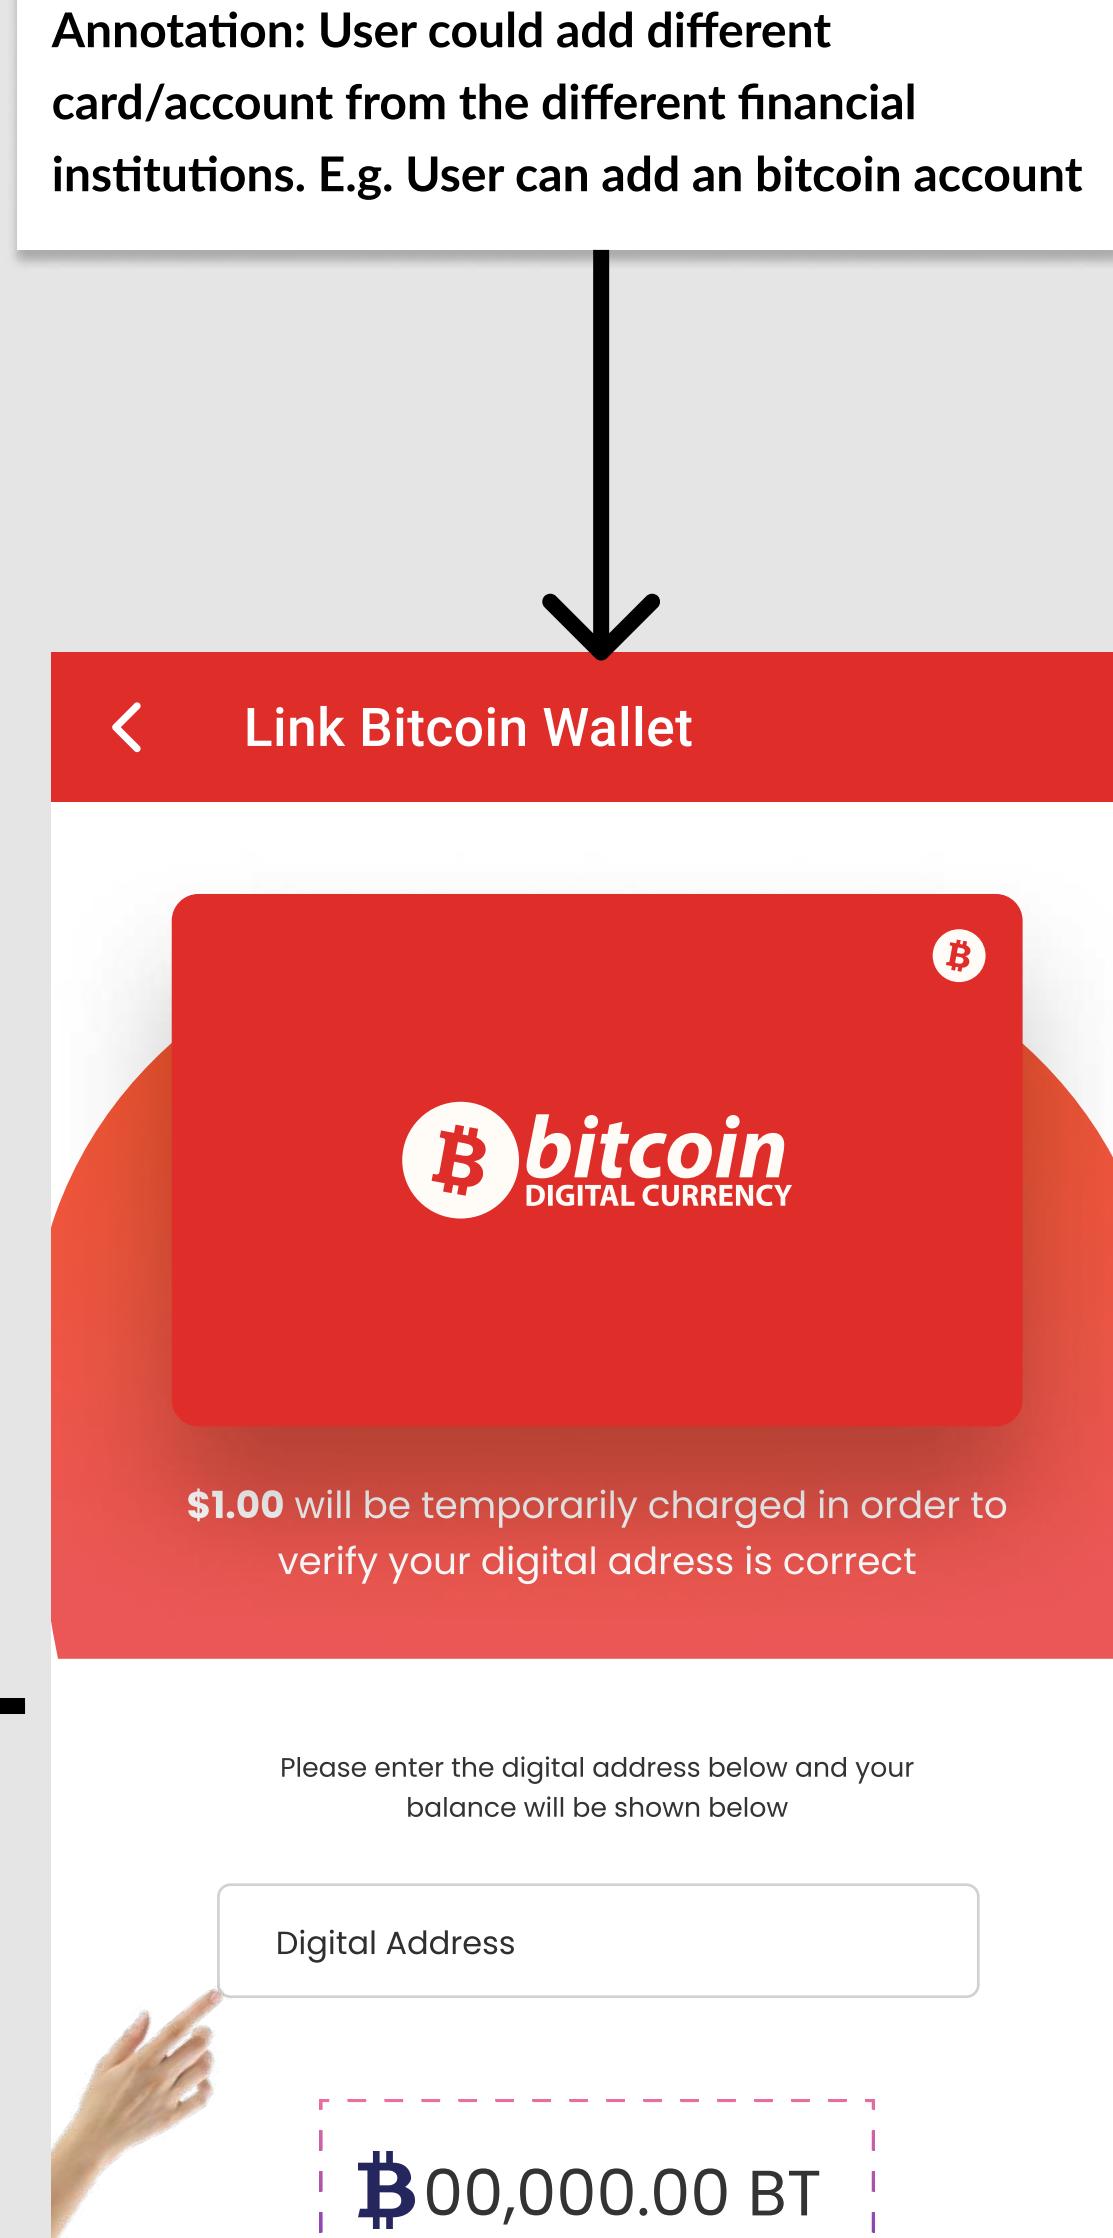

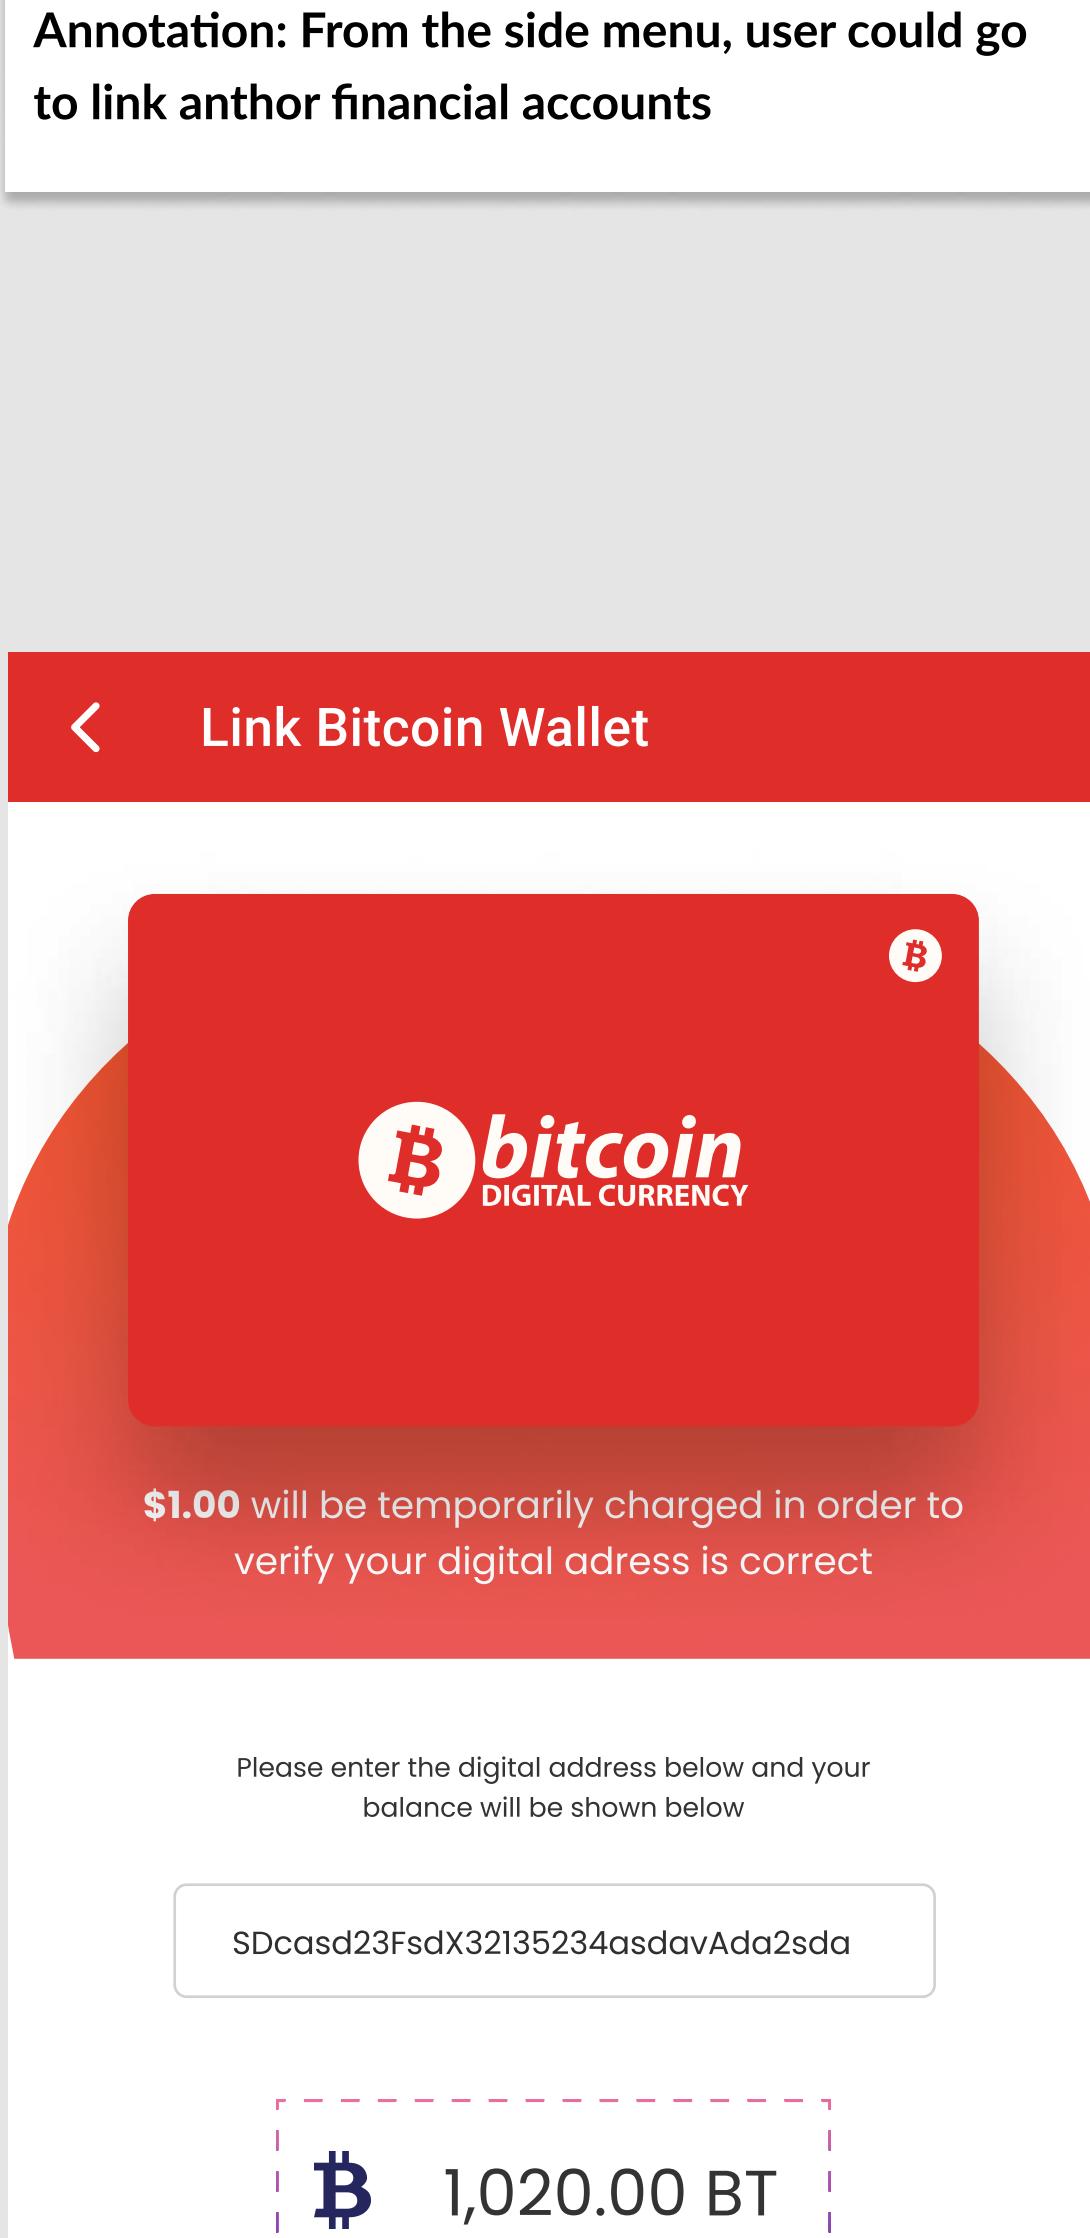

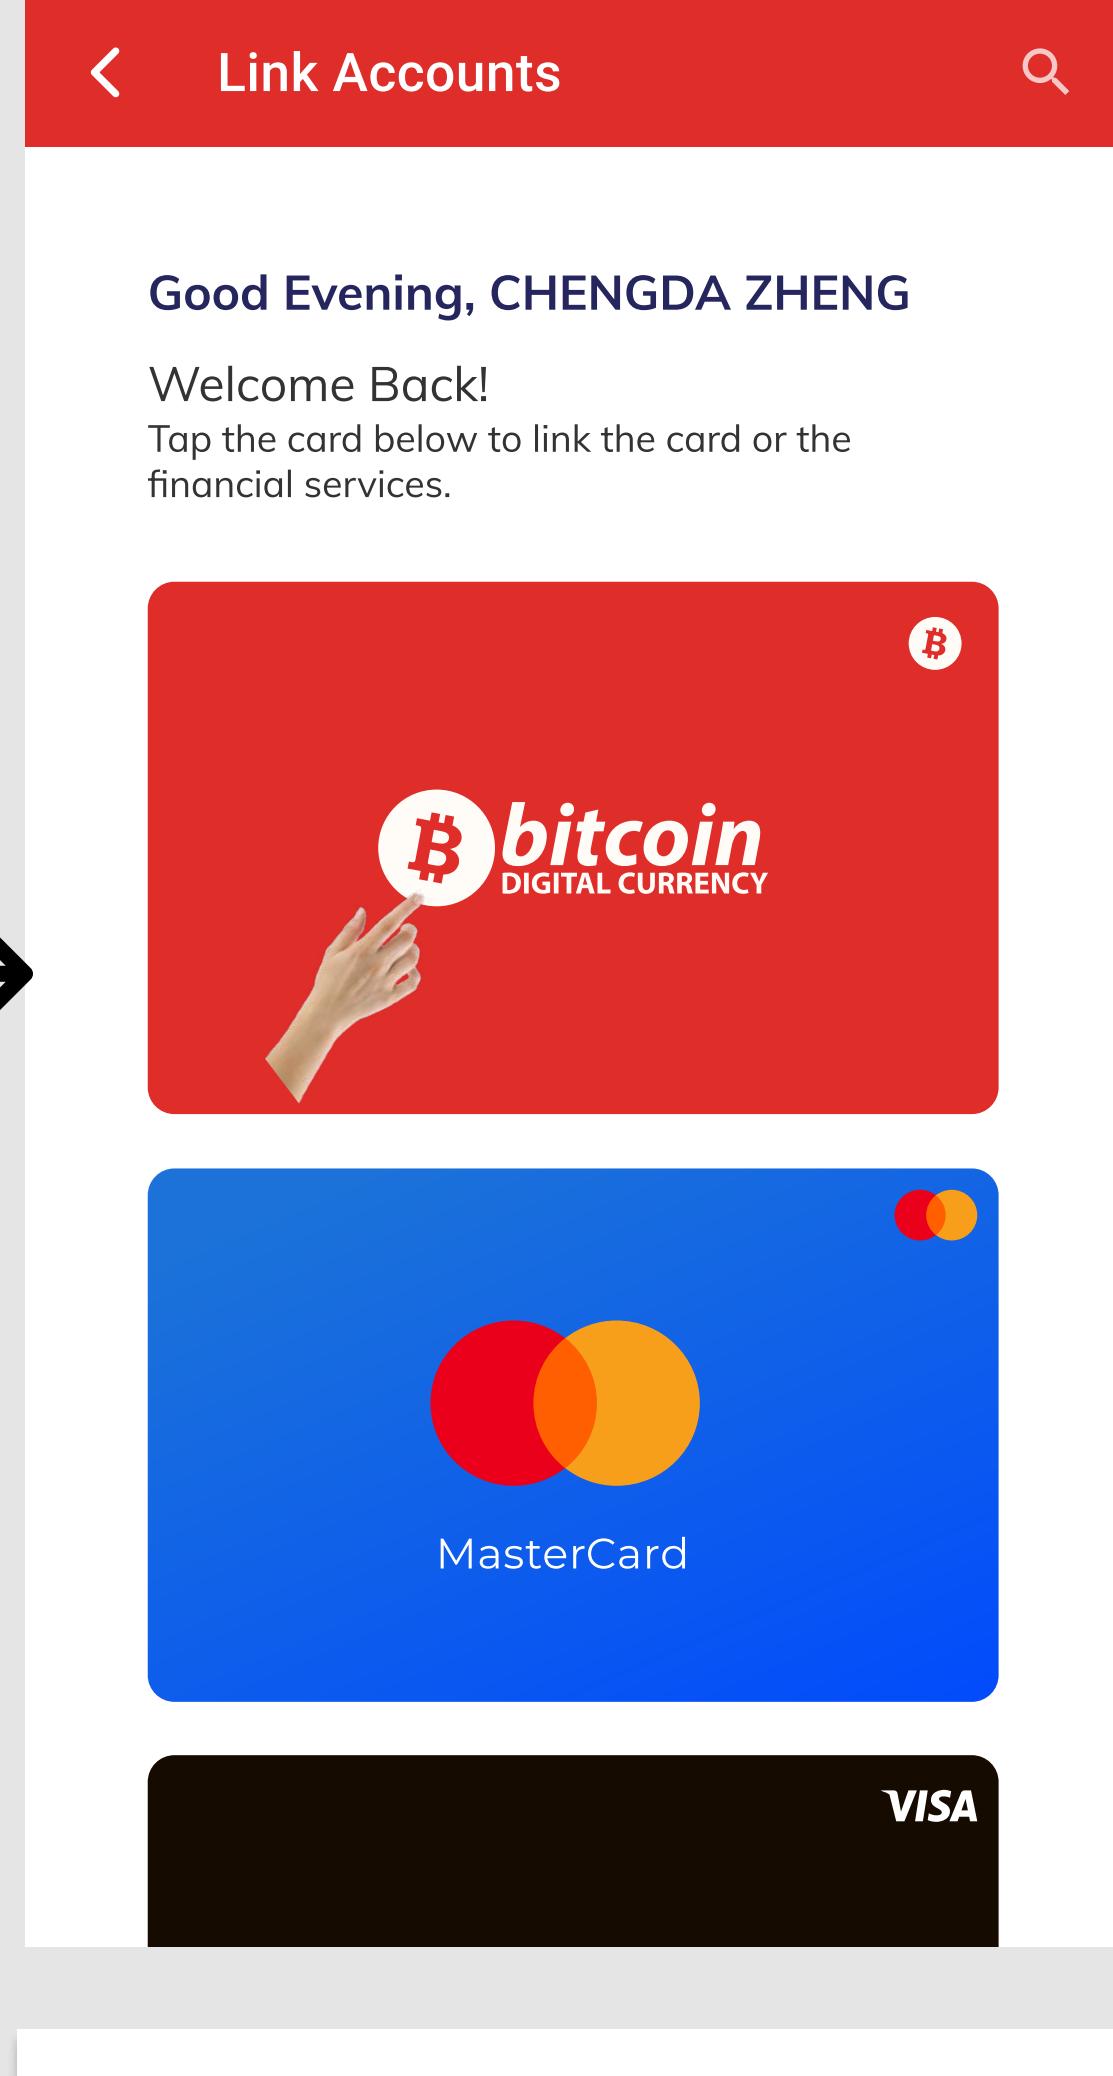

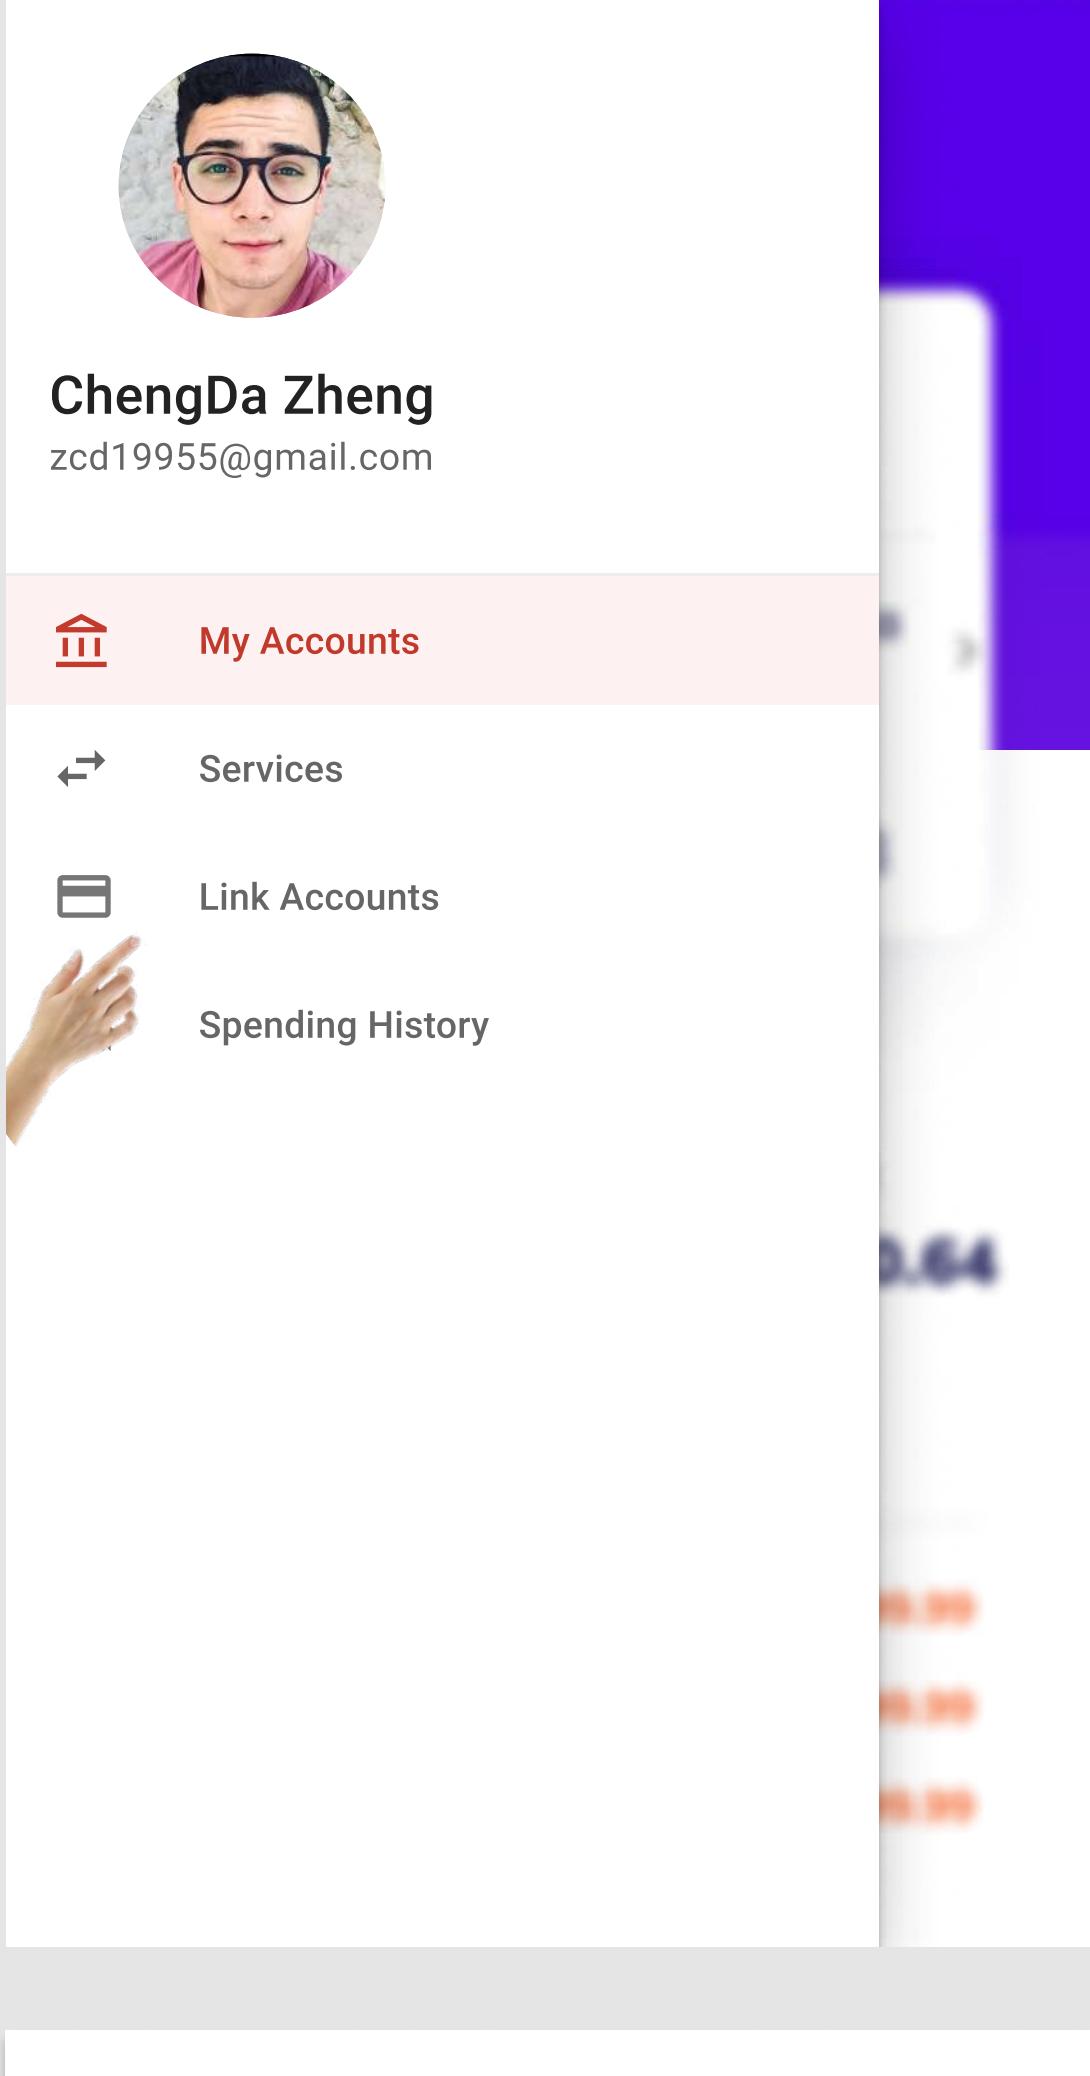

# Switch Card/Financial Account

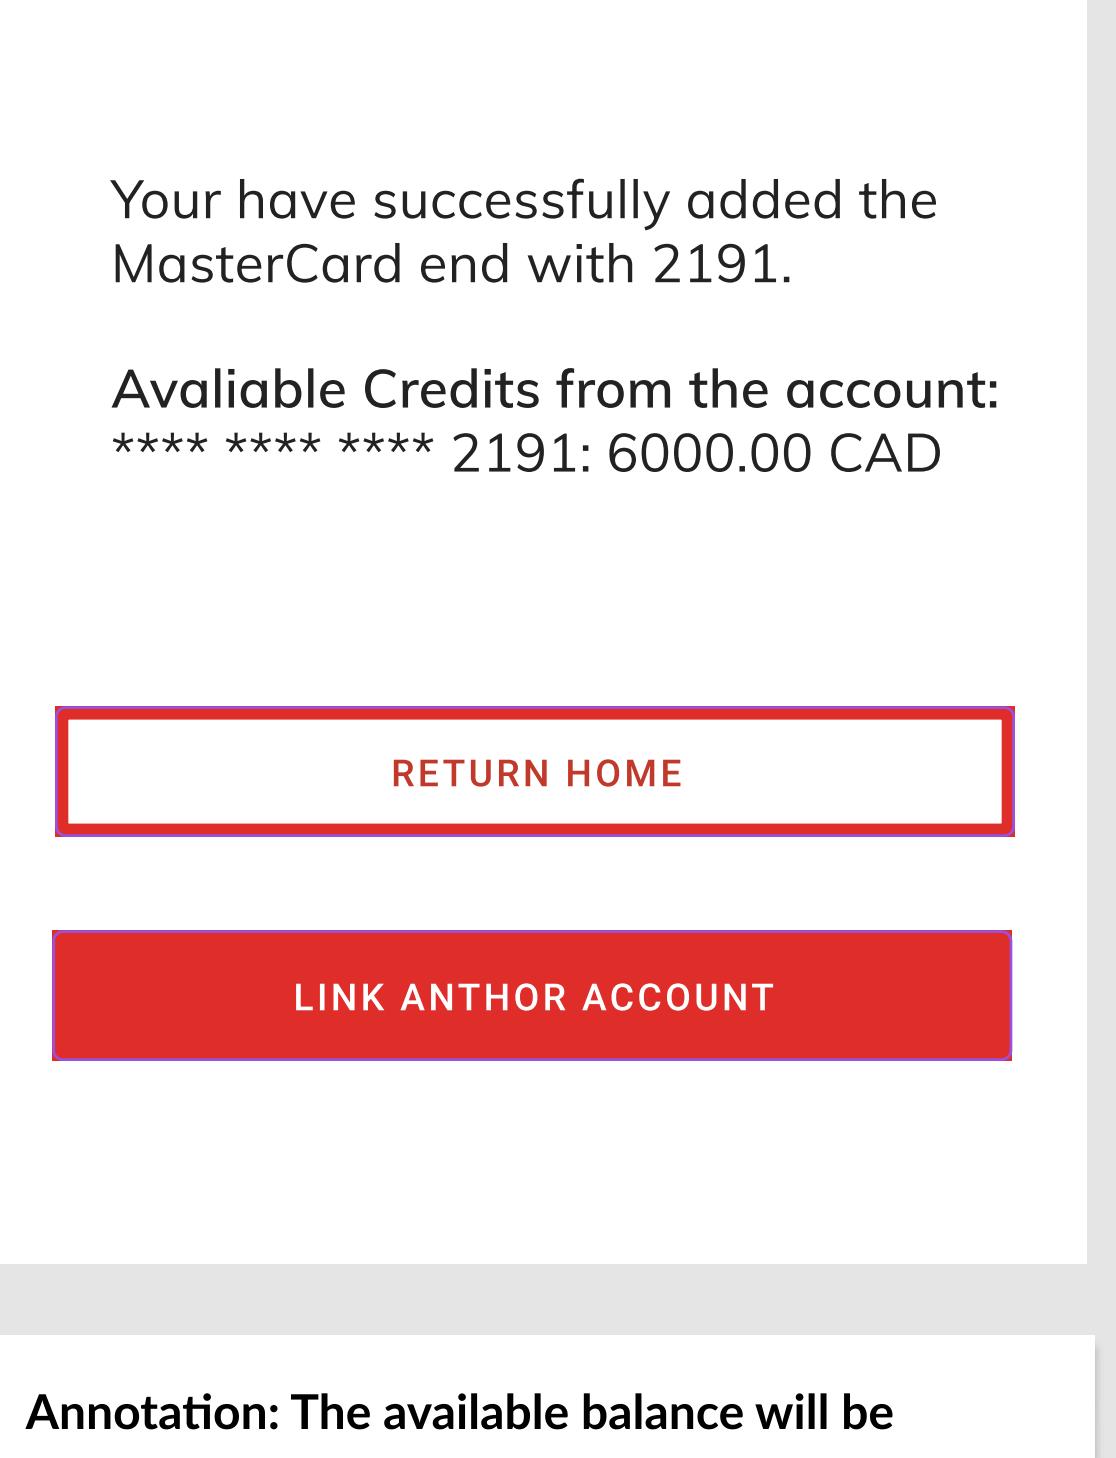

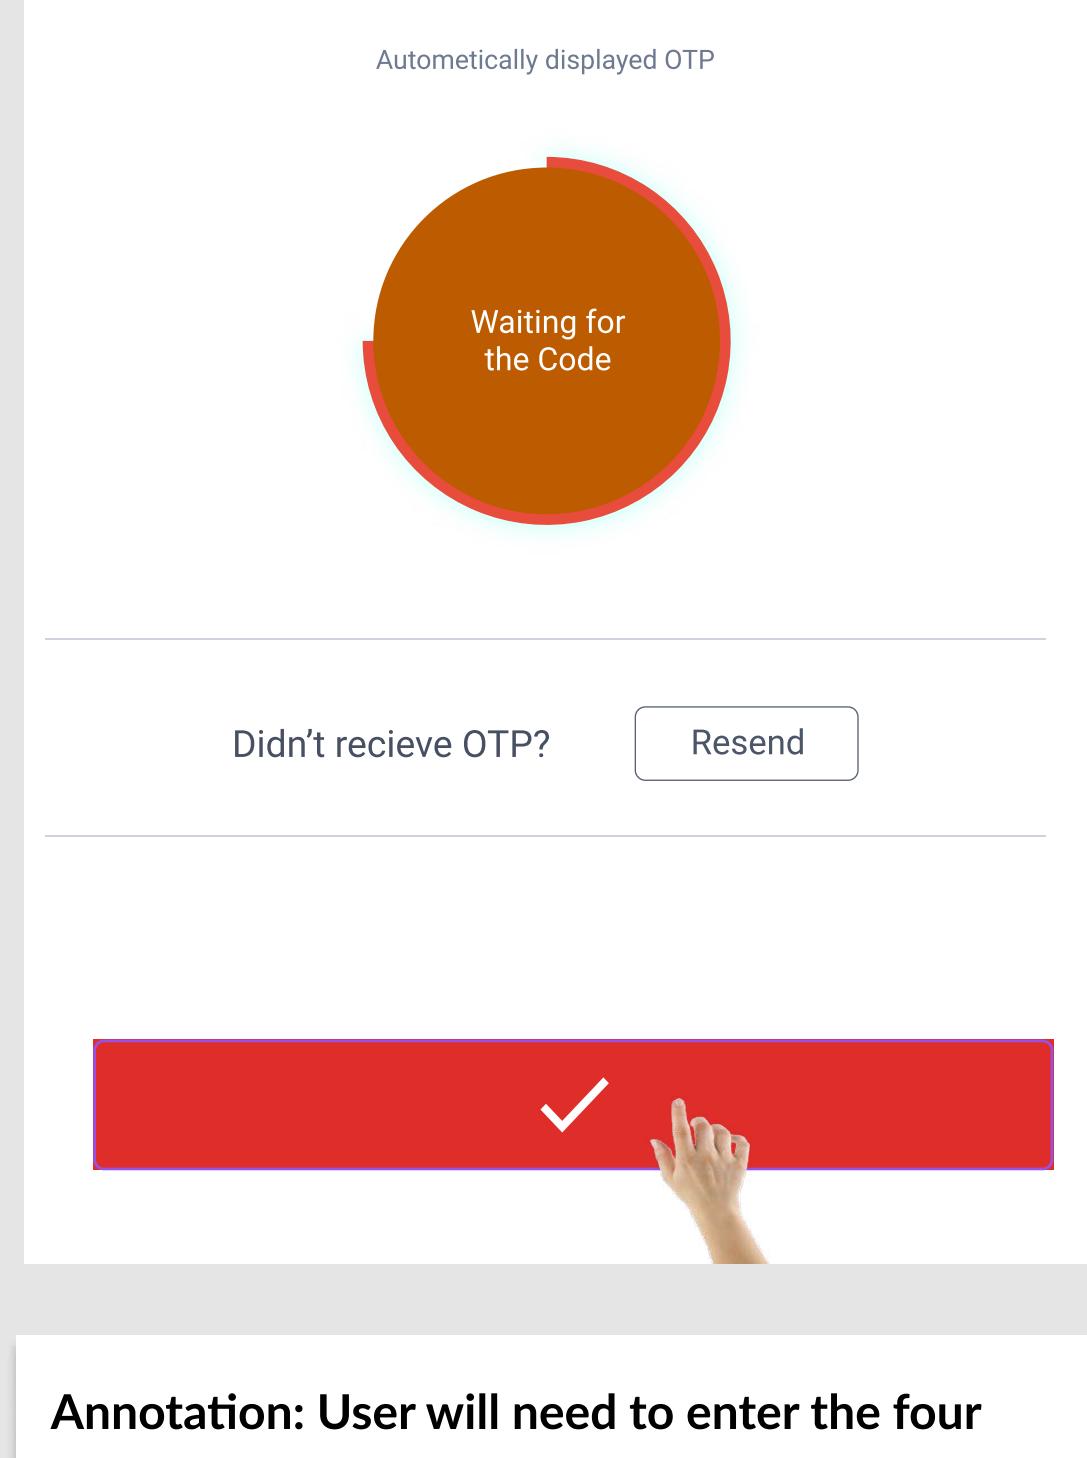

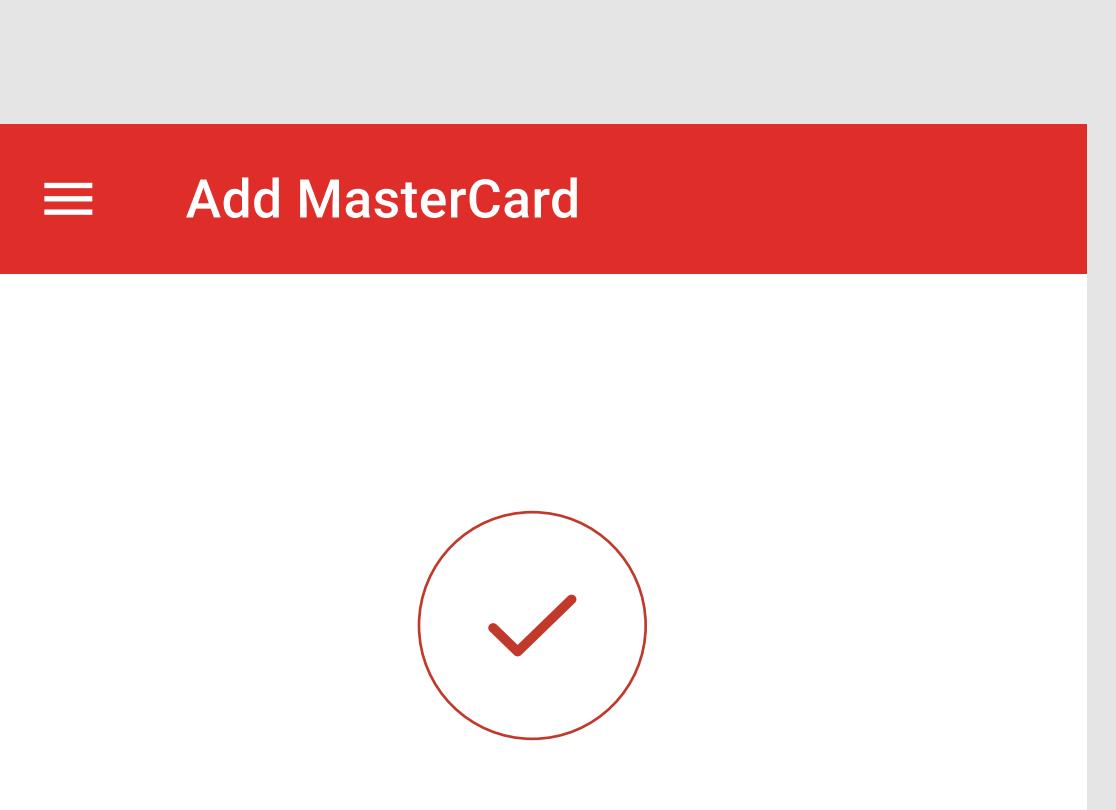

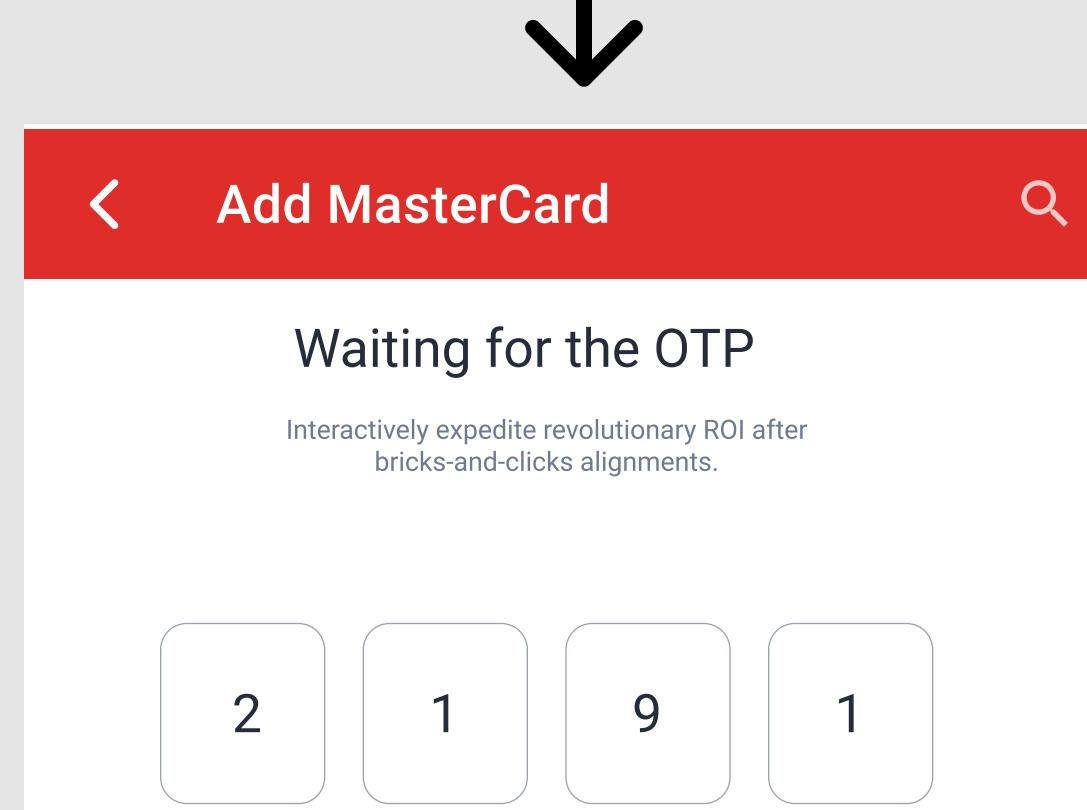

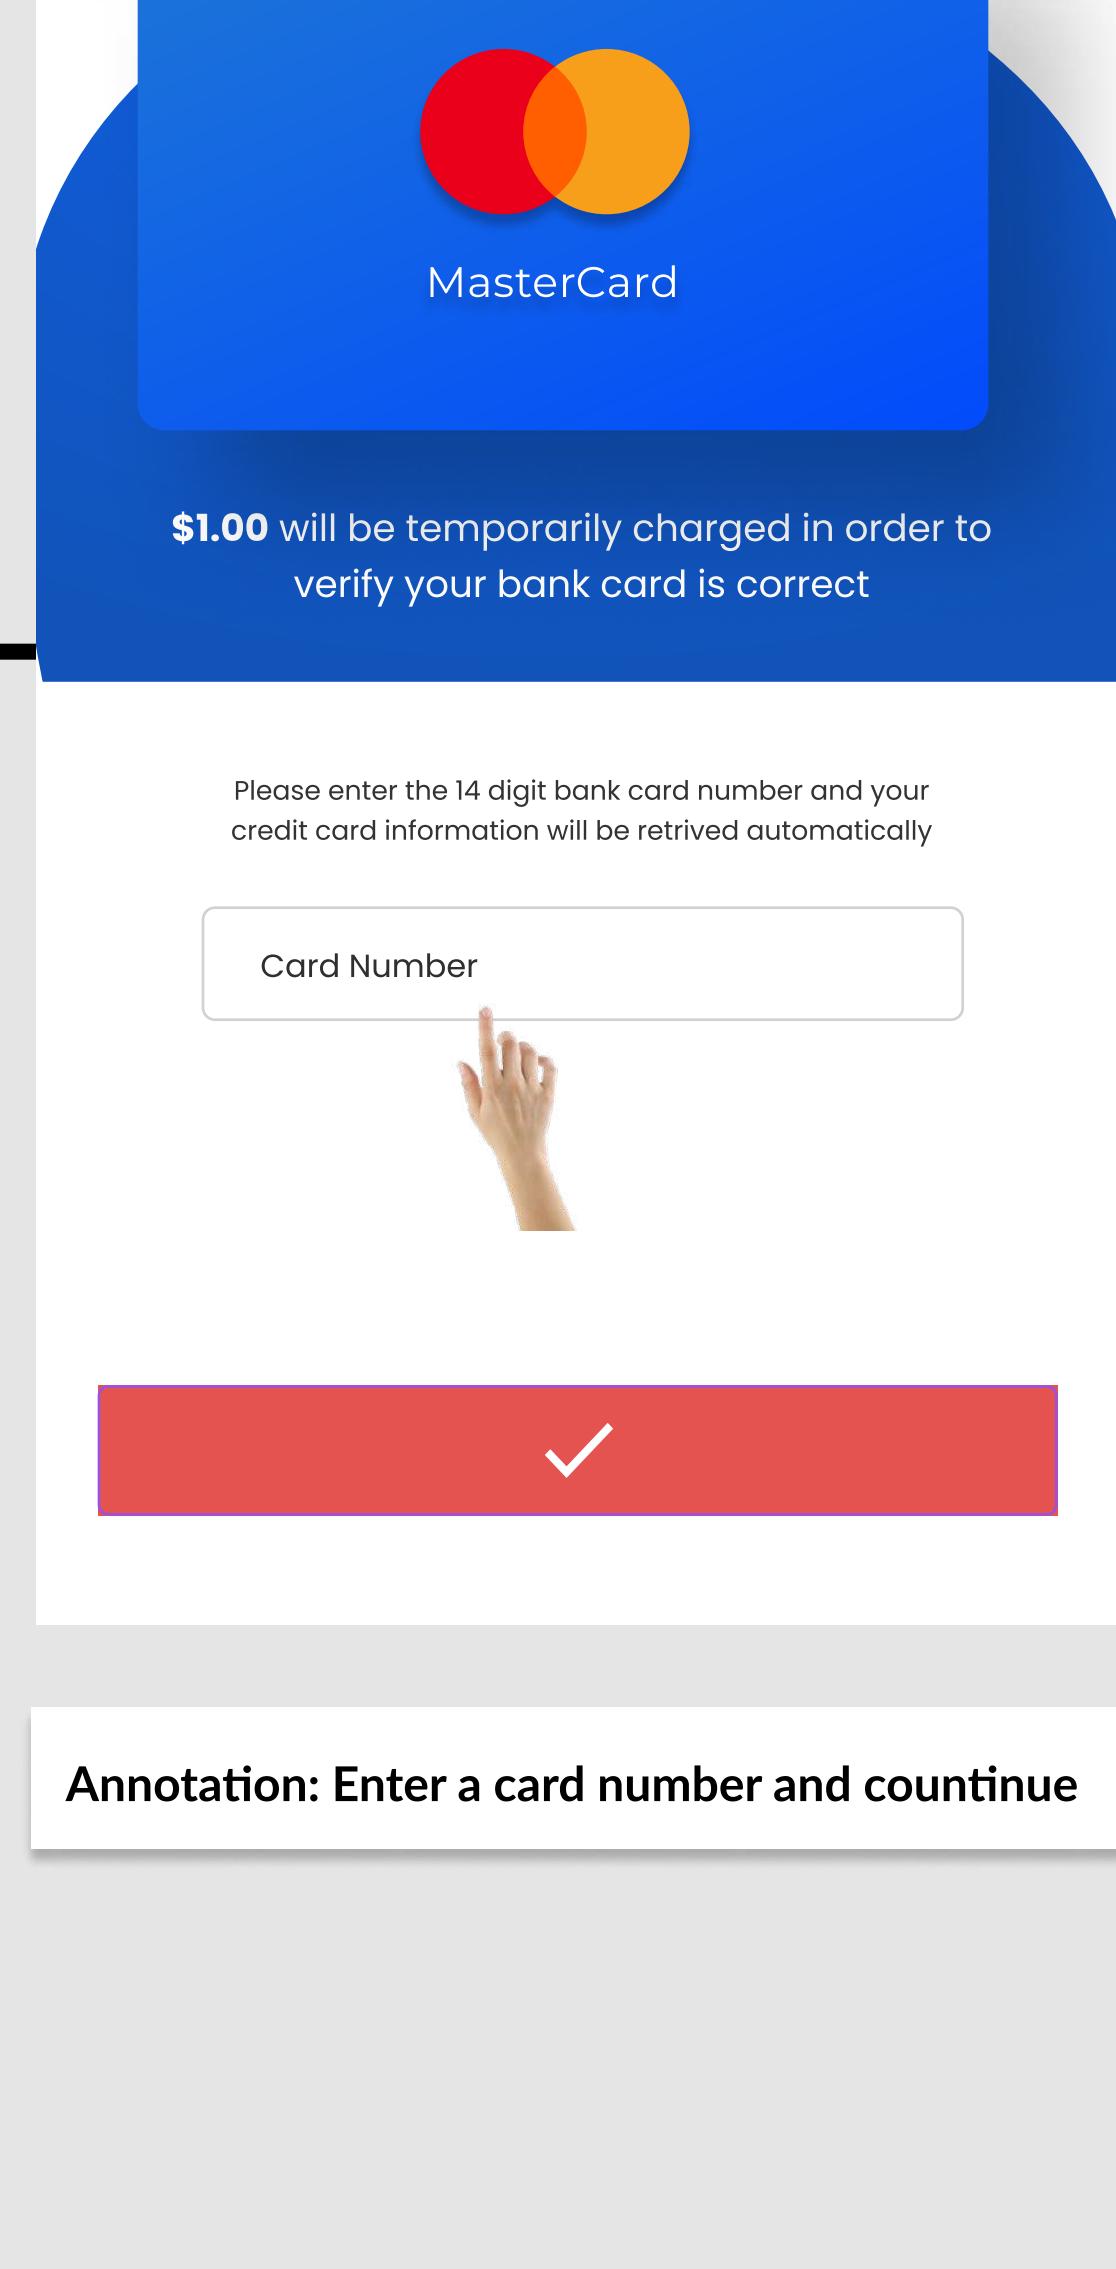

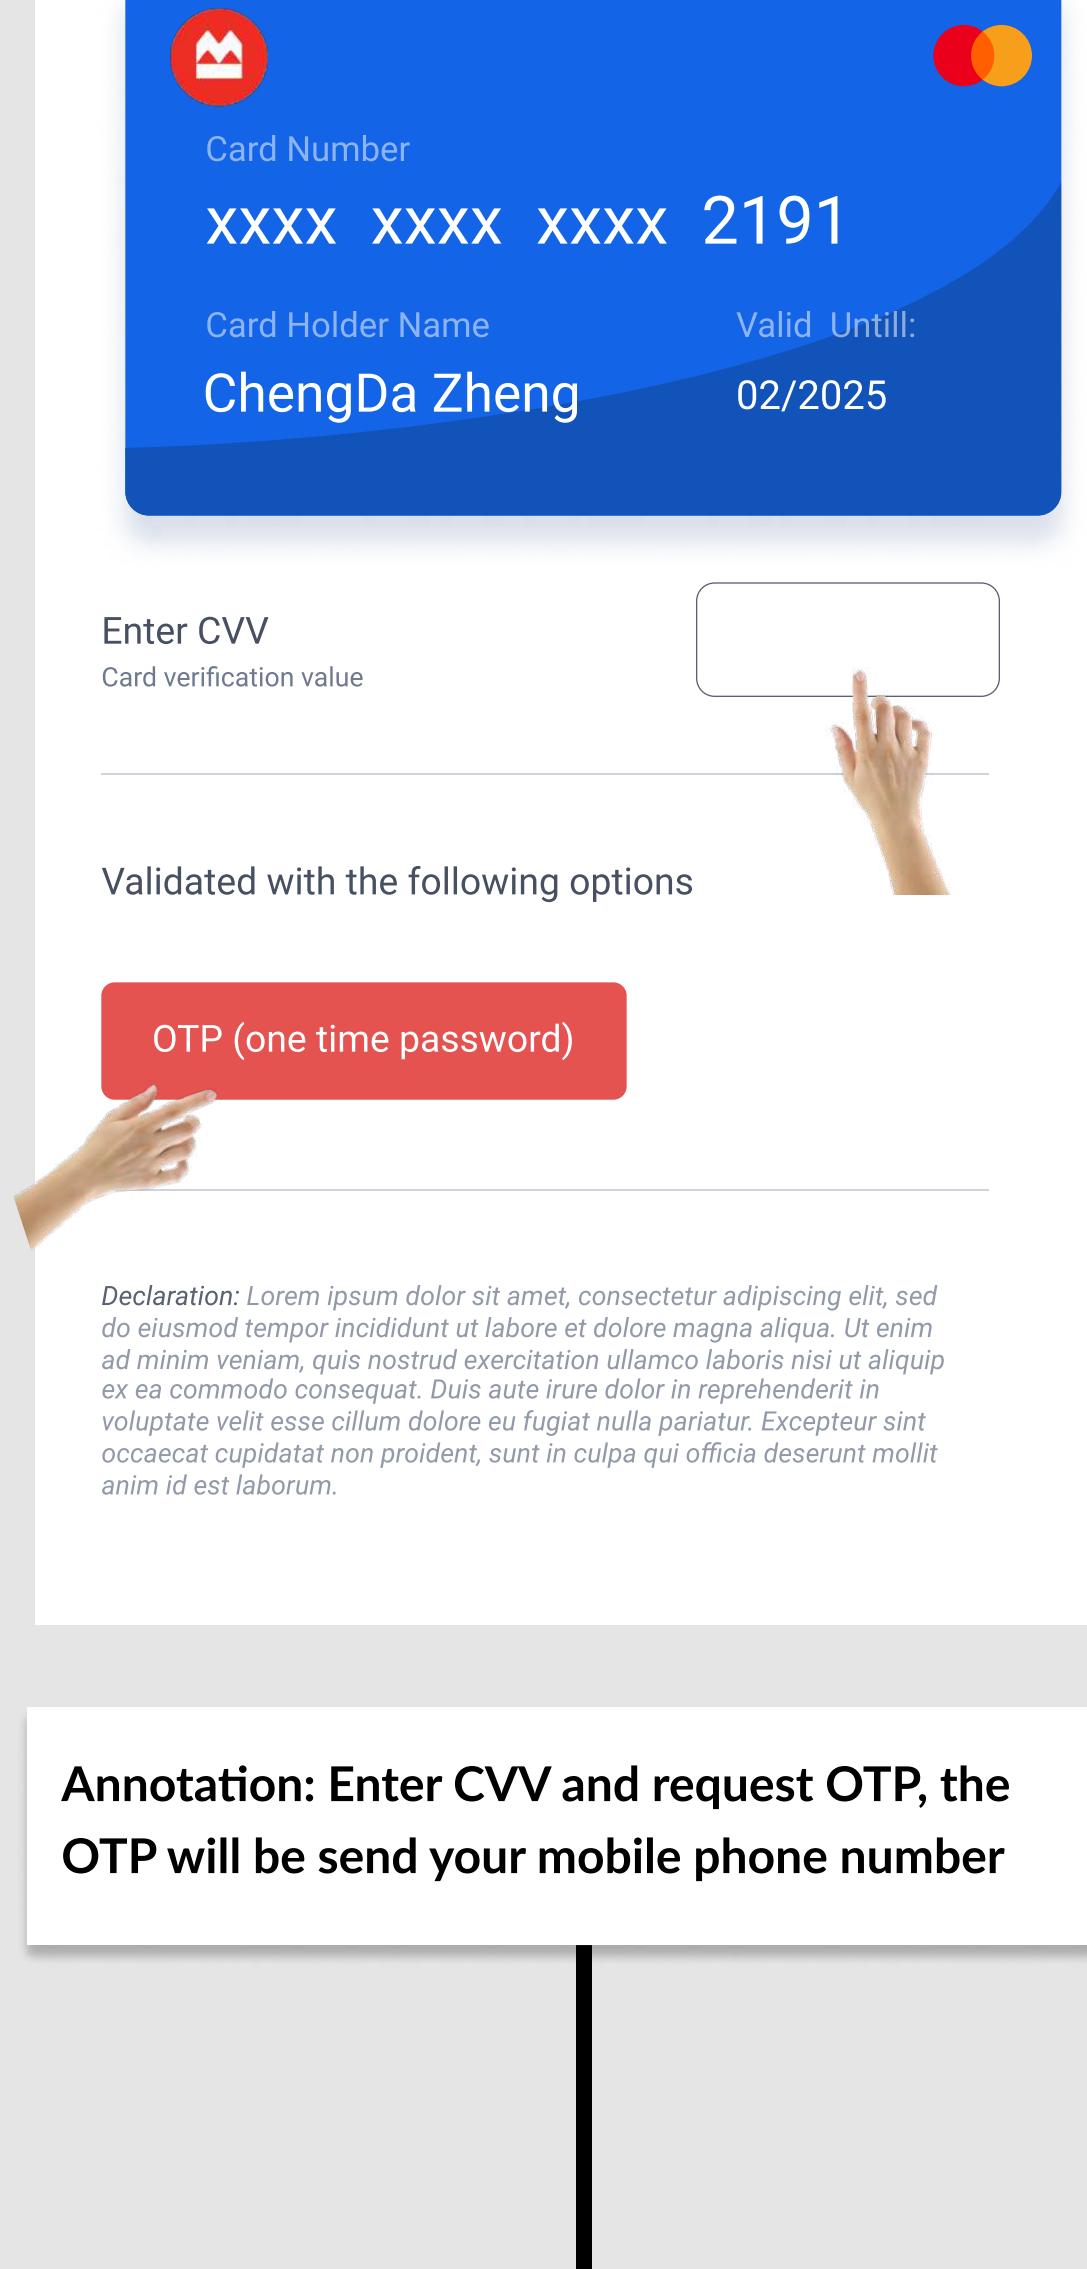

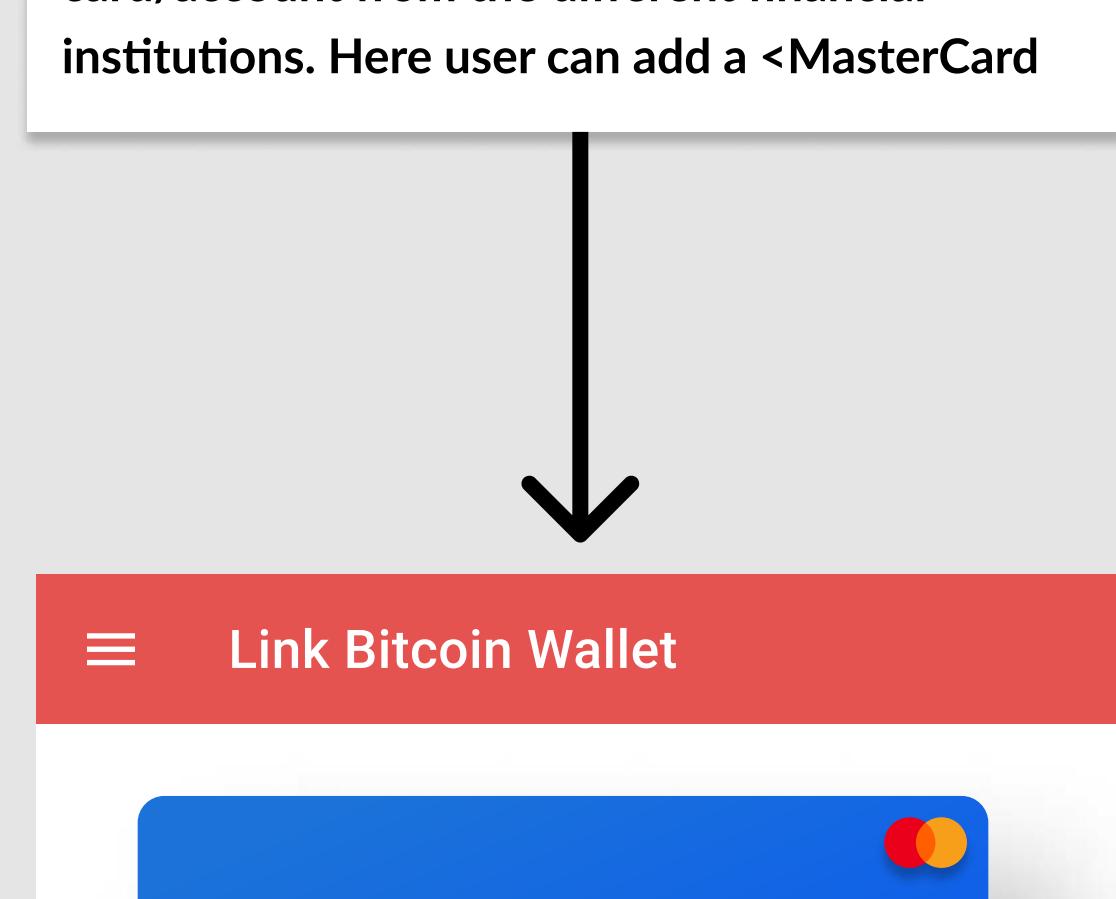

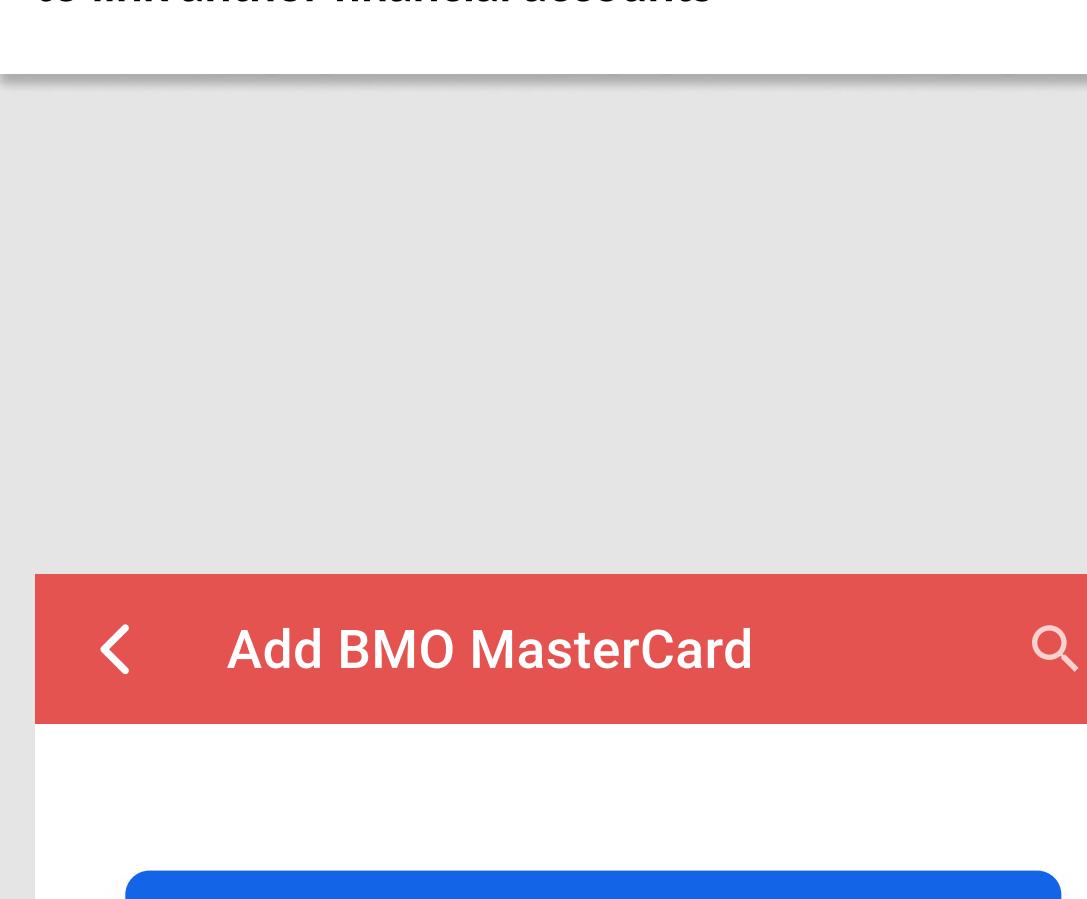

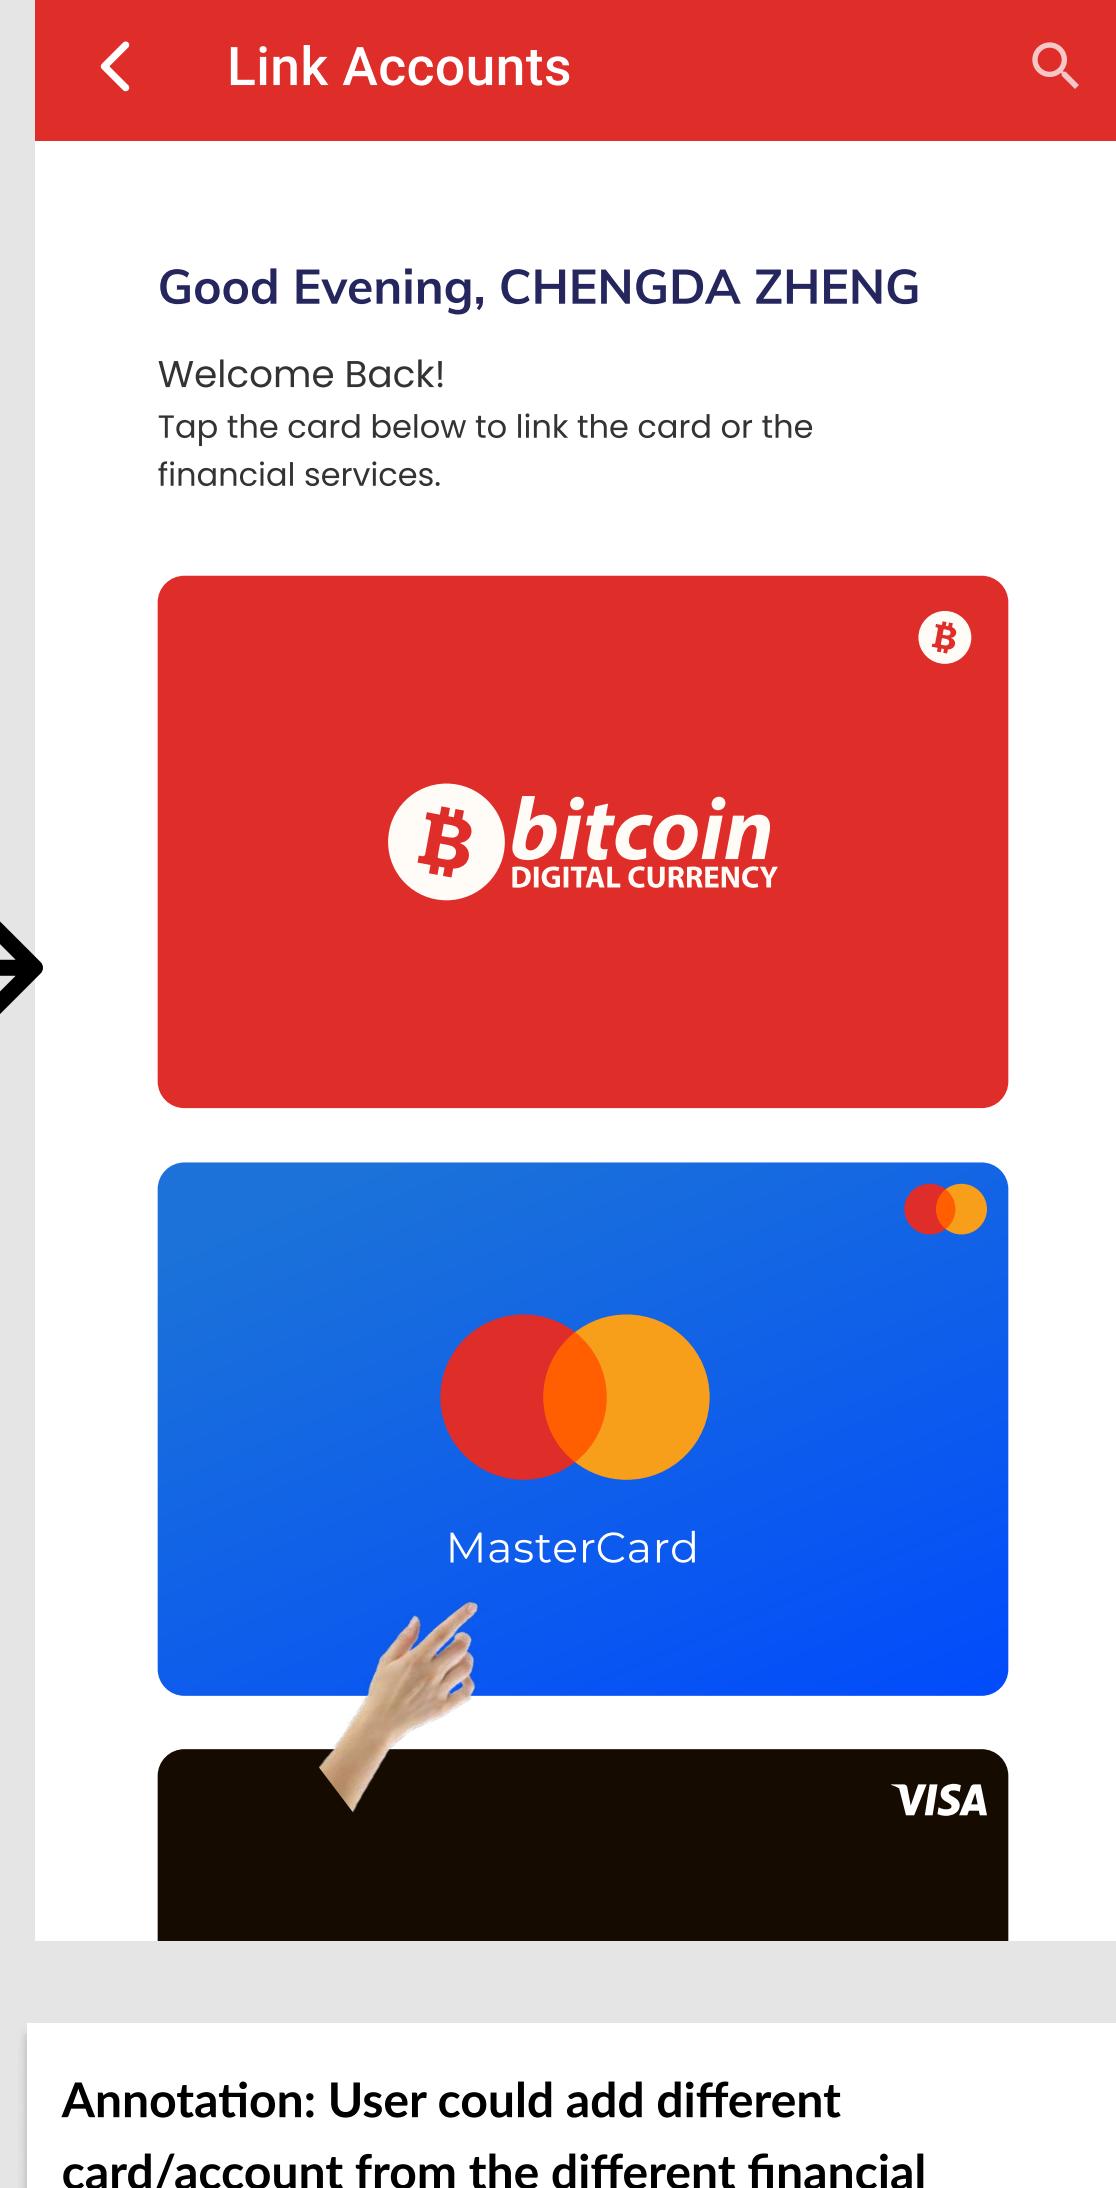

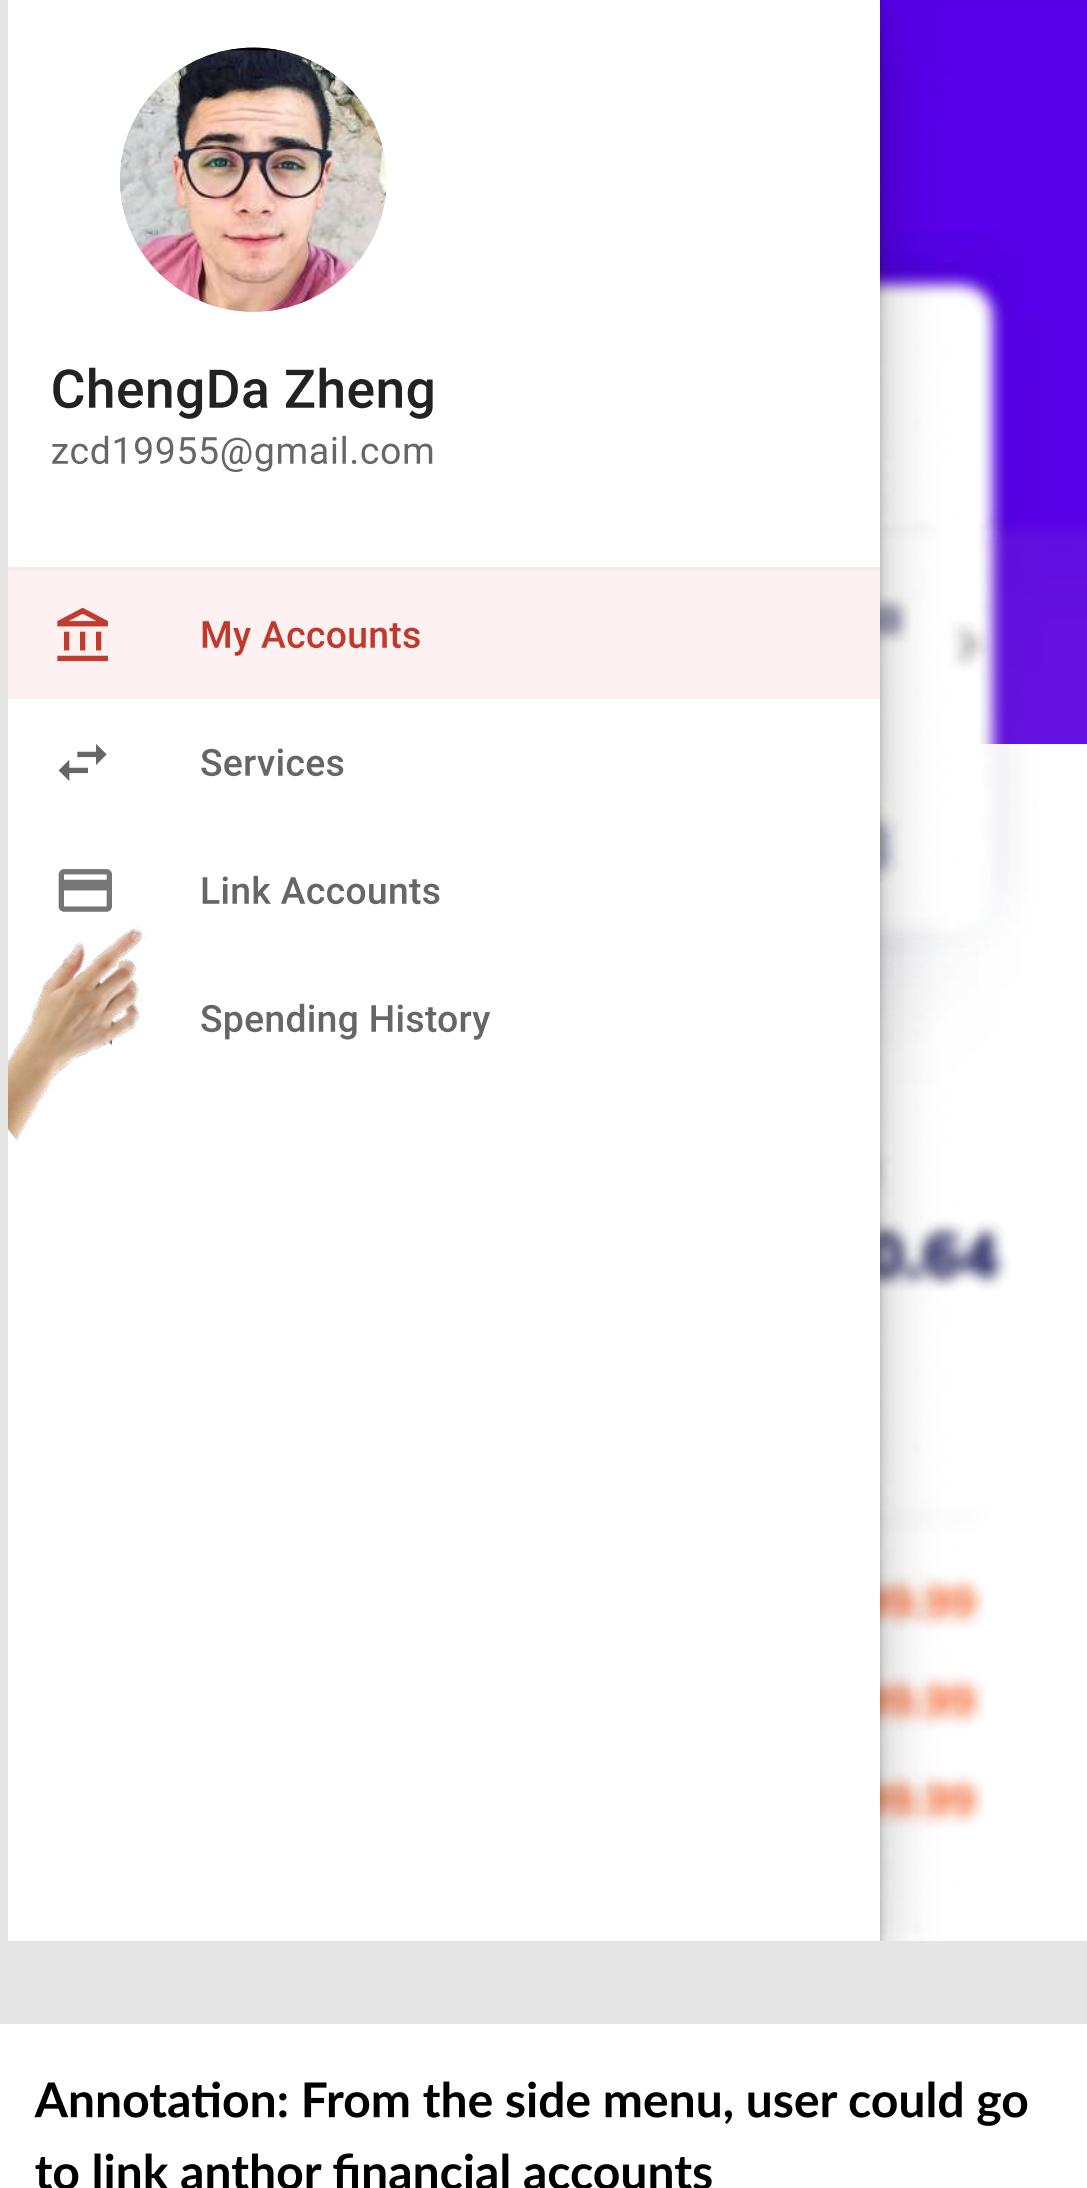

Annotation: Home page and the user could swipe left or right to switch the card (or she/he can click the arrow to switch the card)

Annotation: After user switch to another card, the information on the homepage will be changed correspondingly

# Add Bitcoin Account

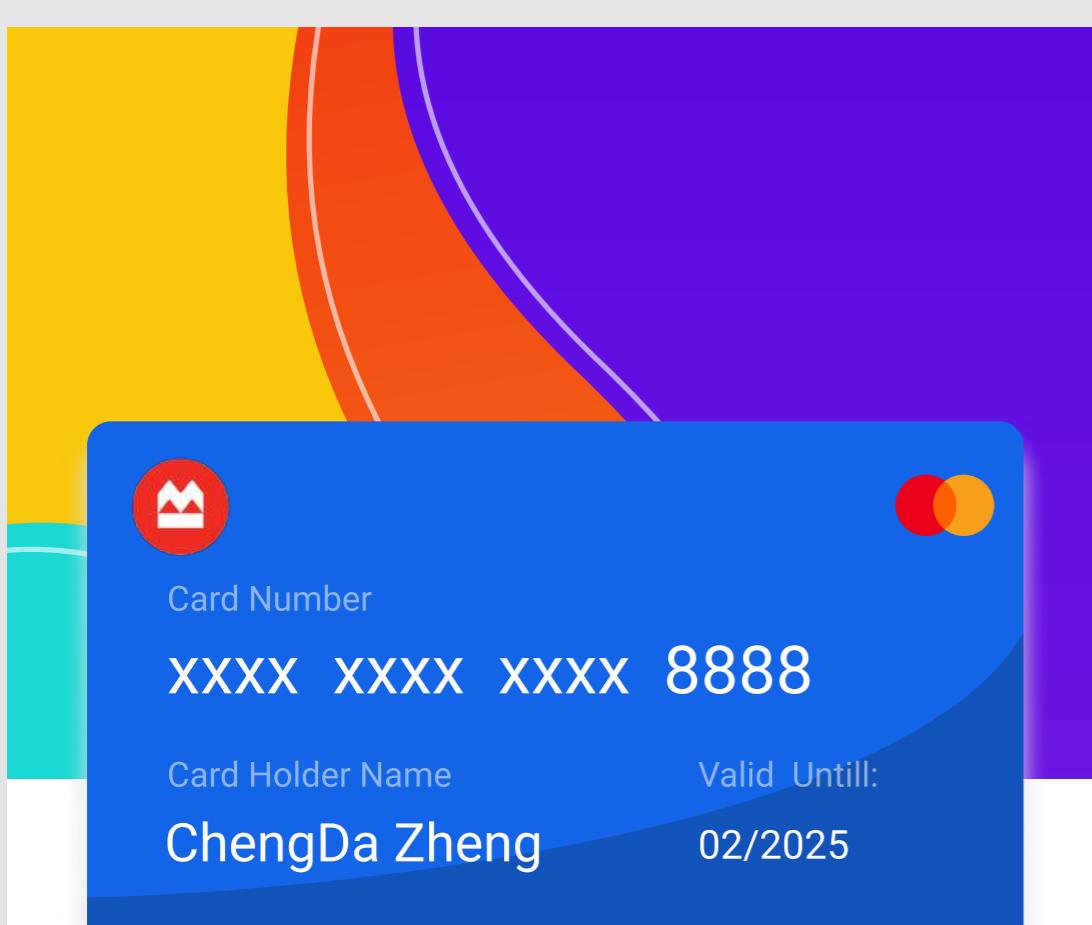

# Add Creditcard to Account

Annotation: User will need to enter the four digit code and click the continue

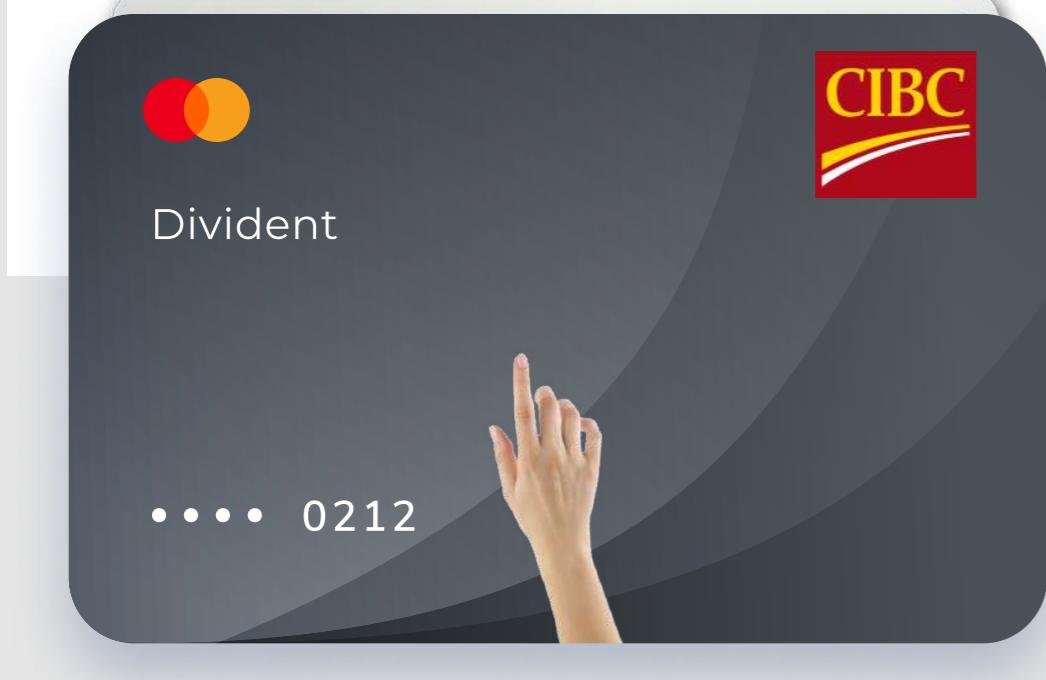

Annotation: The available balance will be updated, the user could link another account or go back to home

# Mobile Pay/Pay at your phone

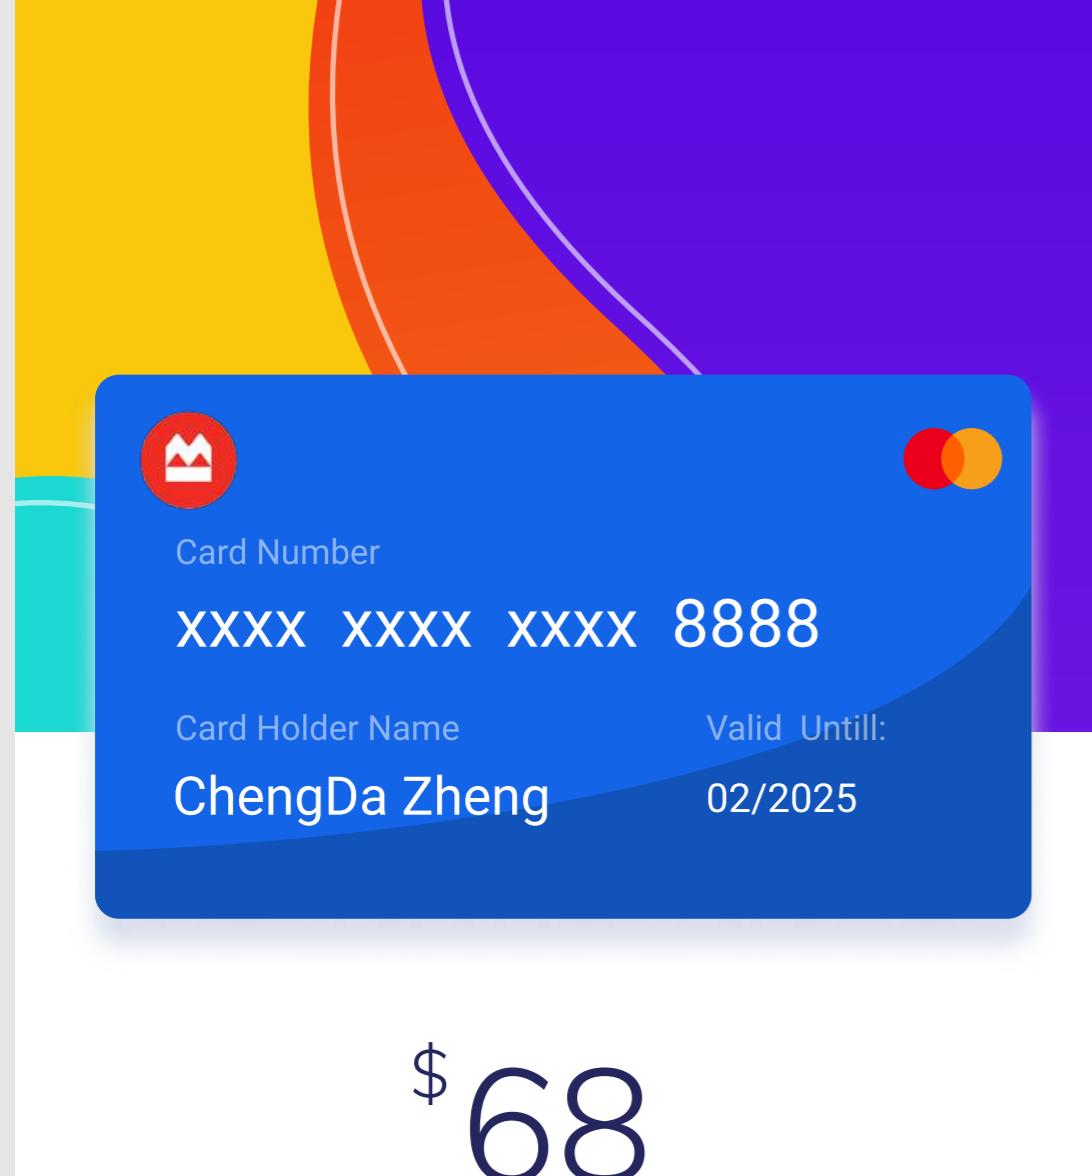

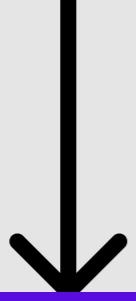

\$ 68

Pay with FigurePrint

Annotation: From any screen from any app or even at the lock screen, when the user holds the phone approaching the POS machine, they will see this screen

\$ 68

Annotation: Use finger print to make the payment and the green mark shows the the payment has been approved.
